

Midwifery Care: Reflections of Midwifery Clients

Mary Ellen Doherty, PhD, RN, CNM

ABSTRACT

The purpose of this study was to describe the lived experience of midwifery clients throughout the life span. A qualitative study using a phenomenological approach was employed. In-depth interviews were conducted with a purposive sample of 12 midwifery clients. The research question was: What has been your experience with midwifery care? Interviews were audio-recorded and transcribed verbatim. Data saturation was achieved and analysis procedures from Colaizzi were used. Five themes emerged from the data: 1) decision to seek midwifery care; 2) working together in a therapeutic alliance; 3) formulating a birth plan; 4) childbirth education; and 5) nurse-midwives as primary health-care providers throughout the life span. There is much to learn from listening to the voices of midwifery clients.

Keywords: midwifery care, nurse-midwives, childbirth, women's health care, phenomenology

According to historical accounts, as women gave birth, they always sought care and support from others. At some point in the cultural evolution, women who were experienced in attending others in childbirth became known as “midwives.” The term midwife means “with woman” (Aveling, 1977; Rooks, 1997; Varney, 1997) and dates back to the 14th century, with its etymology from Old and Middle English. However, accounts dating back to the 2nd century confirm the role of midwives in the birthing process, with the Hebrew Bible containing numerous verses about midwifery, such as Genesis 35:17 and 38:28 and Exodus 1:15–22 (Wansborough, 1985). Furthermore, the mention of birth attendants can be traced to ancient Greek and Roman civilizations as well as in the writings of old Hindu traditions. Evidence of midwifery

has been told in myths, texts, and oral traditions. Thus, as a profession, midwifery claims a social role throughout history in all cultures.

Midwifery in today's health-care arena extends well beyond the childbearing season to include aspects of women's health care such as preconception care, perimenopausal and postmenopausal care, family planning and contraception, childbirth education, well-woman gynecology, and primary care throughout the life span. The midwifery model of care is client-focused and family-centered, embracing the holistic and humanistic principles of health maintenance, health promotion, client education, counseling, advocacy, and collaboration. Women from all walks of life use the services of nurse-midwives—from educated professionals to adolescents, midwifery clients represent the complete

Reflections On Midwifery:

Decision-Making in Midwifery Practice Maureen D. Raynor, Jayne E. Marshall, Amanda Sullivan, 2005-06-01 The book looks at a broad perspective of decision making and each chapter focuses on a specific aspect related to making crucial decisions Following an initial introduction the book explores the concept of autonomy and the many factors that influence autonomous practise The role of knowledge in decision making using evidence to inform decisions as well as different approaches to decision making are also examined including the traditional or rational approach decision analysis and the development of professional judgement Dilemmas arise when decisions are made and therefore ethical decision making is an important component of this book Management decisions may be different from those related to giving specific care to women hence one chapter focuses on making management decisions Emphasis is also placed on the role of the midwife in helping women make their own decisions the role of reflection in enhancing the decisions midwives make and the support midwives can receive from their Supervisor of Midwives Flowcharts explain and facilitate the decision making process A very practical approach to decision making in midwifery with contributions from midwives who have considerable experience in this area Provides guidelines on how to achieve successful autonomous midwifery practice enabling theory to be effectively applied to practice Includes coverage of management roles and decision making as well as clinical scenarios offering frameworks and flowcharts to guide the inexperienced Suggests different approaches to making difficult decisions

Midwifery: Best Practice Volume 5 Sara Wickham, 2009-01-29 This is Volume 5 in the Midwifery Best Practice series Each of the volumes in this Series is built around the familiar core of four main topic areas relevant to midwifery pregnancy labour birth postnatal and stories reflection and also includes a number of focus on sections These are different in each volume and reflect a wide range of key and topical issues within midwifery Each volume builds upon the others to provide a comprehensive library of articles that shows the development of thought in key midwifery areas Volume 5 offers a range of wholly new topic areas within the focus on sections covering the birthing environment women midwives and risk holistic health and working international stories A practical reference source containing a wide range of articles research and original material in an easily accessible format Volume 5 offers a more interactive learning experience by inviting midwives to create their own questions before reading the articles and then returning to these afterwards for reflective thought Diverse opinions on selected topics provide a comprehensive resource for debate and discussion Unique approach includes ideas on how to turn reading into professional development activities Includes 60 articles from *The Practising Midwife* 2004 5 4 research articles from *Midwifery* 2004 5 3 articles from *The Journal of Midwifery and Women's Health* 2003 5 and 5 original articles commissioned for this book 60 articles from *The Practising Midwife* 2004 05 4 research articles from *Midwifery* 2004 05 3 articles from *The Journal of Midwifery and Women's Health* 2003 05 5 original articles commissioned for this book

Midwifery Practice Jo Alexander, Valerie Levy, Carolyn Roth, 1999-11-11 The latest volume in this series

revisits topics particularly pertinent to the postnatal period. It makes a timely contribution to the literature in the context of recent developments in the organisation of midwifery care: the emphasis on woman-centred care and empowerment and the reclaiming by midwives of the normal birth and puerperium.

Waterbirth Stories Maria Paz Miranda, Sian Marie Barnard, 2019-09-05. Drawing on years of midwifery experience of waterbirth, this collection of stories based on real-life events illuminates a rewarding way of birth and emphasises the theoretical knowledge, skills, understanding and resilience needed to practice well. *Waterbirth Stories* includes chapters on the criteria for use of water in labour and birth on the different stages of labour and on some more serious or unusual situations such as shoulder dystocia, postpartum haemorrhage, breech presentation and other unexpected maternal and neonatal events. Each chapter includes several stories from a midwife's perspective told in the context of evidence-based guidelines available for this topic. The stories end with learning points to help readers reflect on their own practice. Ideal for student and practising midwives with an interest in waterbirth, this research-informed book is enjoyable, challenging and informative.

Reflective Practice Beverley J. Taylor, 2000. Reflection is widely taught as a means for nurses and midwives to understand the impact of their actions and how to improve their professional practice.

The Midwife's Labour and Birth Handbook Vicky Chapman, Cathy Charles, 2018-02-05. Praise for the previous edition: An outstanding handbook. It will be a familiar volume on most midwifery bookshelves providing an excellent guide to midwifery-focused care of both woman and child in the birthing setting. Nursing Times Online: Providing a practical and comprehensive guide to midwifery care. *The Midwife's Labour and Birth Handbook* continues to promote best practice and a safe, satisfying birthing experience with a focus on women-centred care. Covering all aspects of care during labour and birth from obstetric emergencies to the practicalities of perineal repair, including left-hand suturing, the fourth edition has been fully revised and updated to include full-colour photographs of kneeling, extended breech and footling breech births, new water birth and breech water birth photographs, female genital mutilation, Sepsis, Group B streptococcus, Care of the woman with diabetes, Neonatal hypoglycaemia, Mental health, Seeding, microbirthing. It also addresses important issues such as: Why are the numbers of UK women giving birth in stirrups RISING rather than falling? Why are so few preterm babies given bedside resuscitation with the cord intact? Would the creation of midwife breech practitioners/specialists enable more women to choose vaginal breech birth and is breech water birth safe? What is the legal position for women who choose to free birth and their birth partners? Why are midwives challenging the OASI care bundle? Incorporating research evidence and anecdotal observations, *The Midwife's Labour and Birth Handbook* remains an essential resource for both student midwives and experienced practising midwives.

Reflections on Midwifery Mavis J. Kirkham, Elizabeth R. Perkins, 1997. Presenting an accessible book which concentrates on the research relating to current issues in midwifery. This challenging yet essential text is authored by an expert team of midwifery contributors. Covers all the key midwifery issues including continuity of care, informed choice, support in labour, caring for women in ethnic minorities.

Midwifery and the Medicalization of Childbirth

Edwin Van Teijlingen, 2000 This book provides an introduction to the sociological study of midwifery The readings have been selected to highlight the interplay between midwifery and medicine reflecting the medicalisation of childbirth It highlights the major themes in both a historical and a current context as well as western and non western societies Two major themes underlie the organisation of this book that the conception of midwifery must be broadened to encompass a sociological perspective and that the ongoing trend toward the medicalisation of midwifery is crucial to an understanding of the historical current and future status of midwifery By medicalisation of childbirth and midwifery is meant the increasing tendency for women to prefer a hospital delivery to a home delivery the increasing trend toward the use of technology and clinical intervention in childbirth and the determination of medical practitioners to confine the role played by midwives in pregnancy and childbirth if any to a purely subordinate one
