School Outing Disaster:

Britain's Railway Disasters Michael Foley, 2014-01-15 Passengers on the early railways took their lives in their hands every time they got on board a train It was so dangerous that they could buy an insurance policy with their ticket There seemed to be an acceptance that the level danger was tolerable in return for the speed of travel that was now available to them British Railway Disasters looks at the most serious railway accidents from the origins of the development of the train up to the present day Seriousness is judged on the number of those who died Information gleaned from various newspaper reports is compared with official reports on the accidents The book will appeal to all those with a fascination for rail transport as well as those with a love of history Michael Foley examines the social context of how injuries and deaths on the railways were seen in the early days as well as how claims in the courts became more common leading to a series of medical investigations as to how travelling and crashing at high speed affected the human body British Railway Disasters Robin Jones, 2019-12-01 This is the story of how Britain's railway disasters horrific though they may be change the network for the better through the crucial lessons that are learned It starts with fatalities on early mining tramways before the dawn of the steam age and takes the story up to the present day While many of Britain's worst tragedies are covered in depth such as Quintinshill in 1915 and Harrow Wealdstone in 1952 the book also looks at others that had resounding consequences for safety **Drowning by Accident** Elizabeth Meinhard, 2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don't recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place **Information and Communication Technologies in Tourism 2014** Zheng Xiang, Iis Tussyadiah, 2014-01-08 The papers presented in this volume advance the state of the art research on social media and Web 2.0 electronic tourism marketing website development and evaluation search engine marketing and optimization IT adoption and diffusion virtual travel communities mobile technologies management information systems in tourism eLearning recommender systems for tourism businesses and destinations and electronic distribution for hospitality and travel products
