- ☀ Theology then is the study of God and how He relates to the universe. It is the scientific pursuit of understanding God. It is the exploration of God's revelation of Himself in the Bible (divine) and our experience (natural). Theology has been referred to as "fides quaerens intellectum" or "faith seeking understanding."

## Science Of Theology:

The Science of Theology; Or the Order of Universal History Established by Scriptural and Historic Data, and Illustrated by a Chart and Tables Robert GREGORY (Author of "The Science of Theology."),1872      **Reality and Scientific Theology** Thomas F. Torrance,2001-11-28 In this book the author argues for a rigorous scientific theology under the double constraint of the reality of God and the reality of the world of space and time Careful attention is given to the common commitment of theological and natural science to objective knowledge and the deeply natural relation between knowledge of God the Creator and knowledge of the world he has made Stress is laid upon the stratified structure of theology and the need for a radical simplification and unification of Christian doctrine Is theology the science of God and is it concerned with objective knowledge like natural science Is there a natural theology and how is it related to knowledge of God through divine relation How is the community of faith within which dogmatic theology arises related to the social coefficient of scientific inquiry What is the place of mysticism and of art in theology Does theology have a special notion of truth and does it have its own inner logic and structure These are some of the main questions which this book seeks to answer      **Theology in the Context of Science** John Polkinghorne,2014-05-14 Just as gendered cultural and geographical perspectives have illuminated and advanced theological thought the contributions of twentieth century science have much to offer theology In his latest book physicist theologian John Polkinghorne renowned as one of the world s foremost thinkers on science and religion offers a lucid argument for developing the intersection of the two fields as another form of contextual theology Countering recent assertions by new atheists that religious belief is irrational and even dangerous Polkinghorne explores ways that theology can be open to and informed by science He describes recent scientific discourse on such subjects as epistemology objectivity uncertainty and rationality and considers the religious importance of the evolution in these areas of scientific thought Then evaluating such topics as relativity space and time and evolutionary theory he uses a scientific style of inquiry as a foundation on which to build a model of Christian belief structure Science and theology share in the great human quest for truth and understanding says Polkinghorne and he illustrates how their interaction can be fruitful for both      *A Christian Theology of Science* Paul Tyson,2022-08-16 An author on the cutting edge of today s theology and science discussions argues that creedal Christianity has much to contribute to the ongoing conversation This book contains an intellectual history of theology s engagement with science during the modern period critiques current approaches and makes a constructive proposal for how a Christian theological vision of natural knowledge can be better pursued The author explains that it is good both for religion and for science when Christians treat theology as their first truth discourse Foreword by David Bentley Hart      *Science and Theology* J. C. Polkinghorne,1998 Eminent scientist and theologian John Polkinghorne offers an accessible yet authoritative introduction to the stimulating field of science and religion After surveying their volatile historical relationship he leads the reader through the whole array of questions that arise at the intersection of the scientific and religious quests Polkinghorne

provides a marvellously clear overview of the major elements of current science including quantum theory chaos theory time and cosmology He offers a concise outline of the character of religion and shows their joint potential to illumine some of the thorniest issues in theology today creation the nature of knowledge human and divine identity and agency He brings the reader to complex ideas so gently and persuasively that at each turn one is inspired to follow the next step of the argument

**Jacket The Big Questions in Science and Religion** Keith Ward, 2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers **Science in**

**Theology** Neil Messer, 2020-06-25 If we wish to understand ourselves and the world in relation to God what contribution to our understanding should we expect from a Christian tradition with its roots in the Bible and what should we expect from the natural sciences Neil Messer sets out five types of answer to that question The responses range from the view that the Christian tradition has nothing to contribute through various forms of dialogue to the claim that science is irrelevant to theological understanding This classification scheme is illustrated and tested by extended explorations of three topics in the science and theology field how to think about God's action in the world how to make theological sense of the suffering and destruction involved in the evolution of life and how theology should respond to the scientific study of religion The classification offers a way to understand and evaluate these debates and the discussion of specific examples demonstrates the strengths and weaknesses of each type of approach The book concludes with suggestions for how readers might use this scheme to guide their own work on science and theology For students and researchers in science and theology this book offers three things a tool for understanding specific debates in science and theology critical surveys of some of the most important debates in the field and a concise guide to ways of setting up encounters of theology with science **Theology**

McGrath, 2006-11-23 New in paperback of the first volume of McGrath's groundbreaking three volume work of Systematic Theology A Scientific Theology Written by one of world's best known theologians these volumes together represent the most extended and systematic exploration of the relation between Christian theology and the natural sciences yet produced Thoroughly ecumenical this will be a significant work for Catholic Orthodox Protestant and evangelical readers The work is marked throughout by a sustained and critical engagement with the history and philosophy of the natural sciences and a passionate commitment to the legitimacy of theology as an academic discipline Nature sets out a vision for a scientific theology in which the working assumptions of the natural sciences are critically appropriated as a theological resource It then moves on to deal at considerable length with the crucially important question of the status of nature which has rarely been given the serious consideration that it deserves Responding sympathetically to the growing consensus that nature is a socially mediated concept McGrath sets out an approach to nature that establishes it as a theologically legitimate notion and explores its positive and constructive role within a scientific theology      *Issues in Science and Religion* Ian G. Barbour, 1966

First published 1966 Includes index Includes bibliographical references      **The Science of God** Alister E. White, 1897      **A History of the Warfare of Science with Theology in Christendom, Vol. I (in Two Volumes)** Andrew D. White, 2010-01-01 The battle between science and religion in American popular life is as old as America itself By the late 19th century it had reached a fever pitch culminating in the two volume 1896 work *A History of the Warfare of Science with Theology in Christendom* The result of thirty years of research by historian and educator ANDREW DICKSON WHITE 1832

1918 a founder of Cornell University this is White's attack on intellectually stifling religious dogma and his explication of the conflict thesis of outright warfare between science and religion While scholars today generally see the situation as more nuanced the conflict thesis remains a popular metaphor in the mind of the general public and White's work continues to speak to us today H L Mencken called this one of the noblest monuments of American scholarship and it will fascinate anyone who is troubled by the ongoing influence by religious authorities into secular science In Volume I White looks at the transformation of our understanding of the world from a primarily religious one of divine creation to a primarily scientific one informed by evolution astronomy and biology

*Key to the Science of Theology* Parley P. Pratt, 2012-02-06 EXCEPTS FROM THE PREFACE

The present is an age of progress of change of rapid advance and of wonderful revolutions The very foundations of society social political commercial moral and religious seem to be shaken as with a mighty earthquake from centre to circumference All things tremble creation groans the world is in travail and pains to be delivered A new era has dawned upon our planet and is advancing with accelerated force with giant strides While every science every art is being developed while the mind is awakened to new thought while the windows of heaven are opened as it were and the profound depths of human intellect are stirred moved from the foundation on all other subjects religious knowledge seems at a stand still One thing is certain according to ancient prophecy and agreeable to the general expectation of this and other ages the day approaches which will flood the earth with the pure principles of religious knowledge a day when none will have to teach his neighbour saying Know ye the Lord for all persons shall know Him from the least to the greatest It should be a matter of serious thought and investigation without respect to party sect or creed whether there should not in the very nature of present circumstances and future Millennial hopes be an entire remodelling or re organization of religious society upon the broad basis of revealed knowledge tangible fact and philosophical scientific and spiritual Truth a universal standard of immutable Truth instead of numberless systems founded on uncertainty opinion mere human impression or conjecture Can anything short of such a standard unite society enlighten the world establish real peace brotherhood and fellowship and put a final end to all religious ignorance superstition jargon or discord Is not a difference of opinion or a disagreement on any given subject a proof positive of existing ignorance or want of light or information on the part of the parties disagreeing If so the present age is certainly in the dark or in a great measure ignorant on religious subjects A knowledge of the Truth can alone bring the desired union and bid discord cease If the Scriptures be true it is not religious opinion which will cover the earth and universally pervade every bosom but it is a KNOWLEDGE The knowledge of God God is Truth To know Him is to know the Truth The present Volume aims to embody in a concise and somewhat original manner and style a general view of the Science of Theology as gathered from revelation history prophecy reason and analogy If the Work proves an introductory key to some of the first principles of the divine science of which it treats if it serves to open the eyes of any of his fellowmen on the facts of the past the present and the future if it leads to investigation and inquiry and calls public attention to the

**Ernan McMullin and Critical Realism in the Science-Theology Dialogue** Paul L.
