Signal Transducers and Activators of Transcription (STATs) P. Sehgal, D. E. Levy, T. Hirano, 2013-06-29 The year 2003 marks the tenth anniversary of the first use of the acronym Stat also written STAT in the scientific literature for a family of transcription factors which rapidly transduce cytokine and growth factor elicited signals from the plasma membrane to the cell nucleus thereby activating gene transcription thus signal Transducers and Activators of Transcription From those beginnings the field of STAT transcription factors their related regulatory molecules and their biology has grown exponentially in many different directions In recognition of the rapid growth and broad scope of the STAT transcription factor field today and to celebrate the tenth anniversary of the use of this term in the scientific literature Kluwer Academic Publishers B V requested us to compile a volume on STAT transcription factors that could serve as an overview of this burgeoning area Thus we wanted a volume that would serve as a reference for what is known about STAT proteins and their biology would describe the current state of ongoing research in this broad area and would look toward the future to try to predict the discoveries that lie ahead Our charge was to seek out the very best experts in the field and to coax them to briefly summarize their areas of expertise **Regulation of Organelle and Cell Compartment Signaling** Ralph A.

Bradshaw, Edward A. Dennis, 2011-04-05 This must have cell signaling title will appeal to researchers across molecular biology biochemistry cell biology and genetics The articles are written and edited by experts in the field and emphasize signaling to and from intracellular compartments including transcriptional responses to cytoplasmic and nuclear signaling events chromatin remodeling and stress responses the regulation of endoplasmic reticulum function control of cell cycle progression and apoptosis and the modulation of the activities of mitochondria and other organelles Articles written and edited by experts in the field Thematic volume covering regulation of endoplasmic reticulum function regulation of cell cycle progression and quality control and assurance in mitochondrion events Up to date research on events in membrane proteins and proteins of intracellular matrix **Signal Transducers and Activators of Transcription (STATS)** P. Sehgal, D. E.

Levy, T. Hirano, 2014-01-15 **Encyclopedia of Cancer** Manfred Schwab, 2008-09-23 This comprehensive encyclopedic reference provides rapid access to focused information on topics of cancer research for clinicians research scientists and advanced students Given the overwhelming success of the first edition which appeared in 2001 and fast development in the different fields of cancer research it has been decided to publish a second fully revised and expanded edition With an A Z format of over 7 000 entries more than 1 000 contributing authors provide a complete reference to cancer The merging of different basic and clinical scientific disciplines towards the common goal of fighting cancer makes such a comprehensive reference source all the more timely **Jak-Stat Signaling : From Basics to Disease** Thomas Decker, Mathias

Müller, 2012-06-06 JAK tyrosine kinases and STAT transcription factors constitute a signaling pathway which is activated by cytokines By activating gene transcription it regulates essential biological responses to environmental cues The Jak Stat

pathway is involved in the regulation of cell development differentiation proliferation and apoptosis Improper function may contribute to hematopoietic malignancies and cancer This book provides comprehensive insights into the latest basic and clinical developments in the field The first part reviews recent findings and new technologies pertaining to basics of Jak Stat function The second part describes the evolution of Jak Stat signaling and the role of the pathway in invertebrate organisms The third part focuses on Jak Stat signaling in hematopoietic cells under both physiological and pathophysiological conditions Finally chapters in the fourth section describe the relationship of Jak Stat signaling to various states of disease particularly infection leukemias and solid cancers The book is intended for all scientists in molecular biology biochemistry and cell biology dealing with biomedical issues Encyclopedia of Immunobiology ,2016-04-27 Encyclopedia of Immunobiology Five Volume Set provides the largest integrated source of immunological knowledge currently available It consists of broad ranging validated summaries on all of the major topics in the field as written by a team of leading experts The large number of topics covered is relevant to a wide range of scientists working on experimental and clinical immunology microbiology biochemistry genetics veterinary science physiology and hematology The book is built in thematic sections that allow readers to rapidly navigate around related content Specific sections focus on basic applied and clinical immunology The structure of each section helps readers from a range of backgrounds gain important understanding of the subject Contains tables pictures and multimedia features that enhance the learning process In depth coverage allows readers from a range of backgrounds to benefit from the material Provides handy cross referencing between articles to improve readability including easy access from portable devices **Handbook of Cell Signaling** Edward A.
