Silicon-based Structural Ceramics Brian W. Sheldon, Stephen C. Danforth, 1994 **Carbide, Nitride and Boride Materials Synthesis and Processing** A.W. Weimer, 2012-12-06 Carbide Nitride and Boride Materials Synthesis and Processing is a major reference text addressing methods for the synthesis of non oxides Each chapter has been written by an expert practising in the subject area affiliated with industry academia or government research thus providing a broad perspective of information for the reader The subject matter ranges from materials properties and applications to methods of synthesis including pre and post synthesis processing Although most of the text is concerned with the synthesis of powders chapters are included for other materials such as whiskers platelets fibres and coatings Carbide Nitride and Boride Materials Synthesis and Processing is a comprehensive overview of the subject and is suitable for practitioners in the industry as well as those looking for an introduction to the field It will be of interest to chemical mechanical and ceramic engineers materials scientists and chemists in both university and industrial environments working on or with refractory carbides nitrides and borides Computational Modeling of Materials and Processing Joseph Habib Simmons, 1997 The proceedings of the May 1995 symposium contain 32 papers representing myriad disciplines and size scales and reflecting interactions between theoretical computational and experimental research Modeling at the atomistic and molecular level includes calculations of glass and crystalline struct Transactions of JWRI. 0000. 00000000, 2002 Ceramic Source , 2003 Comprehensive Hard Materials Daniele Mari, Luis Miguel, Christoph E. Nebel, 2014-02-01 Comprehensive Hard Materials Three Volume Set deals with the production uses and properties of the carbides nitrides and borides of these metals and those of titanium as well as tools of ceramics the superhard boron nitrides and diamond and related compounds Articles include the technologies of powder production including their precursor materials milling granulation cold and hot compaction sintering hot isostatic pressing hot pressing injection moulding as well as on the coating technologies for refractory metals hard metals and hard materials The characterization testing quality assurance and applications are also covered Comprehensive Hard Materials provides meaningful insights on materials at the leading edge of technology It aids continued research and development of these materials and as such it is a critical information resource to academics and industry professionals facing the technological challenges of the future Hard materials operate at the leading edge of technology and continued research and development of such materials is critical to meet the technological challenges of the future Users of this work can improve their knowledge of basic principles and gain a better understanding of process structure property relationships With the convergence of nanotechnology coating techniques and functionally graded materials to the cognitive science of cemented carbides cermets advanced ceramics super hard materials and composites it is evident that the full potential of this class of materials is far from exhausted This work unites these important areas of research and will provide useful insights to users through its extensive cross referencing and thematic presentation To link academic to industrial usage of hard materials and
