*Moral Imagination and Management Decision-making* Patricia Hogue Werhane, 1999 Why do good people do ethically questionable things Why do reputable businesses ignore the harmful consequences of their actions These questions continue to challenge philosophers legal scholars and corporate leaders In this pathbreaking book Patricia Werhane sets forth a model that explains ethical failings in business and shows how to transcend them Deleterious corporate actions are often attributed to simple greed and regulations have traditionally been enacted to counter them But Werhane argues that most corporate managers are not without moral sensibilities nor are

they motivated primarily by greed or self interest Indeed companies themselves often attempt to improve ethical behavior most American companies today have values statements and ethics training is widespread but applying moral principles to practical decision making has not been entirely successful What is missing according to Werhane is a highly developed moral imagination that enables managers and the companies they run to be aware of evaluate and change the mental models that often constrict business behavior The development of moral imagination is not identified merely with increased sensitivity to the existence of ethical issues in business It includes awareness of the mind sets that govern managerial and corporate decision making the development of reasoning skills to evaluate and moderate these mind sets and creativity to ponder viable alternative solutions to what appear to be insoluble economic dilemmas Unique in its sophisticated application of ethical reasoning to real day to day business problems this book points the way to the exemplary moral leadership that will enable companies to flourish in the complex global economies of the twenty first century **This Mortal Coil** Fay Bound

Alberti,2016-04-08 To many people the idea that the body has its own history might sound faintly ridiculous The body and its experiences are usually seen as something that we share with people from the past Like human nature it represents the unchanging in a changing world Bodies just are But the body does have a history The way that it moves feels breathes and engages with the world has been viewed very differently across times and cultures For centuries we were believed to be composed of souls that were part of the body and inseparable from it Now we exist in our heads and our bodies have become the vessels for that uncertain and elusive thing we call our true selves The way we understand the material structure of the body has also changed radically over the centuries From the bones to the skin from the senses to the organs of sexual reproduction every part of the body has an ever changing history dependent on time culture and place This Mortal Coil is an exploration of that history Peeling away our assumptions about the unchanging nature of the human body Fay Bound Alberti takes it apart in order to put it back anew telling the cultural history of our key organs and systems from the inside out from blood to guts brains to sex organs The understanding of the modern body she reveals in the process is far removed from the eternal or timeless object of common assumption In fact she argues its roots go back no further than the sixteenth century at the earliest and it has only truly existed in its current form since the nineteenth century Partnership for Health Christina

Zimmermann,1998 Susan Zimmermann talked with forty women about perhaps one of the most sensitive issues of body image and health their breasts the chief attribute of femininity In the aftermath of the early 1990s controversy over the use of silicone breast implants how do women decide to undergo surgery o enhance or reconstruct their bodies How does surgery alter a woman s self image How did they face the possibility of debilitating autoimmune disease from rupturing or leaking implants Some opted for breast implants after mastectomies others for cosmetic reasons Some felt empowered by the surgery Being a woman I just like breasts and felt like I got ripped off I did it for myself Others were pressured by their husbands He used to make fun of parts of my body And he made me believe that if I was ever to leave him no one would have anything to do with me because I was this deformed type of person After surgery some women were ecstatic while others had a sense of inner conflict about what they had done to themselves were they faking it And a few were angry I was really angry inside that I had had to put plastic bags filled with chemicals in my body in order for me to feel like I could do the Hoochie Koo on Saturday nights I didn t wear tight clothes I didn t want my children to find out Now having faced years of medical and personal uncertainty many have coped by reassessing their lives and their relationships by sharing information and support with other women with implants outreach that became a means for self empowerment
