This course is structured to provide a deeper insight into the fundamental concepts of human and Artificial Intelligence emphasizing the role of Machine Learning ML as a pivotal contributor to AI's growth. Participants will explore the general definition of human and AI, delve into the concept of learning from experience and understand how this is integral to Machine Learning based on Tom Mitchell's explicit definition. The course also illuminates how AI is an essential component of Universal Design and the Fourth Industrial Revolution. A significant focus is given to the challenges posed by AI including a comparison of AI limitations against human systems and the ethical dilemmas AI presents. Participants will gain a comprehensive understanding of the risks associated with AI, typical funding sources for AI projects and an enumeration of AI's potential applications. Crucially, the course will demonstrate how AI, particularly Machine Learning, is set to enhance collaboration between humans and machines. It will also provide a forecast of future directions in this symbiotic relationship, outlining the evolving landscape of human-machine collaboration. This courseware educates for The EXIN BCS Artificial Intelligence Essentials, testing the fundamental concepts of AI. Follow-up modules on this course are The AI for Business and Government certification, the AI Brevet, which was established by the Netherlands AI Coalition (NL AIC) as a standard for professionals who want to use Artificial Intelligence. The EXIN BCS Artificial Intelligence Foundation, which has a more IT technical perspective. **EDN**, 1995 **Smart Home Automation with Linux and Raspberry Pi** Steven

Goodwin, 2013-07-27 **Smart Home Automation with Linux and Raspberry Pi** shows you how to automate your lights, curtains, music and more and control everything via a laptop or mobile phone. You'll learn how to use Linux, including Linux on Raspberry Pi, to control appliances and everything from kettles to curtains, including how to hack game consoles and even incorporate LEGO Mindstorms into your smart home schemes. You'll discover the practicalities of wiring a house in terms of both power and networking, along with the selection and placement of servers. There are also explanations on handling communication to and from your computer with speech, SMS, email and web. Finally, you'll see how your automated appliances can collaborate to become a smart home. **Smart Home Automation with Linux** was already an excellent resource for home automation and in this second edition, Steven Goodwin will show you how a house can be fully controlled by its occupants, all using open source software and even open source hardware like Raspberry Pi and Arduino.
