Psychiatric Nursing Certification Review Guide for the Generalist and Advanced Practice Psychiatric and Mental Health Nurse Victoria Mosack, 2010-10-25 Review Guides Certification Prep Pocket Guides **Anxiety Management Training**

Richard M. Suinn, 2013-11-11 This book owes its existence to an ideal a burning frustration and a trusted believer The ideal was the sense that governed my feelings about systematic desensitization during my early introduction to its benefits It is hard to put into words the initial doubts that pervaded me during my first attempt with desensitization with a seriously phobic client as I religiously worked my way through the procedure Will this client really become relaxed And then what will the visualization actually occur And then what will the fear really vanish just like that And oh the feeling of discovery and validation when indeed the process worked and worked well Desensitization was everything it was claimed to be systematic clean theoretically grounded empirically tested applicable as a behavioral technology regardless of one's own theoretical bias And there were testable outcomes concrete evidence for change So I became invested and aimed at doing more with desensitization My students and I raised some theoretical questions in order to open the doors for revising the desensitization to improve on its applications We tested the rapidity with which desensitization could be accomplished shortening the time by shortening the anxiety hierarchy Along with others we studied the question of group delivery and reducing the total number of sessions as well as examining the use of audiotaped delivery of services Treating Mental Illness and Behavior Disorders in Children and Adults With Mental Retardation Anton Doen, Kenneth Day, 2008-08-13 Since the 1970s the development of normalization philosophy and the implementation of community care policies have highlighted the nature and treatment of psychiatric and behavior disorders in people with mental retardation and rekindled the interest of scientists psychiatric practitioners and service providers With these changes has grown a substantial body of new research and information on the phenomenology epidemiology classification and clinical features of mental illness and behavior disorders in mentally retarded persons In response to this growing interest and awareness the editors together with internationally renowned contributors from the United States and Europe have compiled the first comprehensive handbook of the current theory and practice of mental health treatment and care in mentally retarded children and adults Both contemporary and in depth this multidisciplinary multidimensional volume covers all available therapeutic methods including psychopharmacotherapy psychotherapy behavior therapies cognitive therapy and the systems approach for all the main diagnostic disorders in people with mental retardation Parts I and II present an overview of epidemiology and clinical presentation including research trends and therapeutic methods including psychotherapy psychopharmacology behavioral therapies cognitive and social learning treatments and working with families and caregivers Parts III and IV focus on psychotherapeutic interventions such as rational emotive group treatment with dually diagnosed adults pre therapy for persons with mental retardation who are also psychotic and systemic therapy and how to apply these methods to the

treatment of specific mental illnesses such as schizophrenia epilepsy and mood and anxiety disorders Parts V and VI discuss how to treat behavior disorders such as aggression self aggression pharmacotherapy and strategic behavioral interventions and self injurious behaviors multimodal contextual approach including group therapy for sex offenders and a pedagogical approach to behavior problems and which treatment methods such as psychodynamically oriented psychotherapy and pharmacotherapy are most effective with children including developmental dynamic relationship therapy with more severely mentally retarded children Parts VII and VIII provide guidance on mental health services and staff training including psychiatric treatment in community care and a model for inpatient services for mentally ill persons with mental retardation and the editors final chapter which draws together all the various therapeutic approaches described in previous chapters to provide a practical framework for an integrative approach Filling a major gap in the literature this indispensable resource for psychiatrists psychologists and educators working with mentally retarded persons is also intended for general practitioners doctors social workers and therapists working in the same or related fields
