zero to master Imran Manzoor,5x,2019-08-18 The great secret of our time is that there are still uncharted frontiers to explore and new inventions to make In Zero to at least one legendary entrepreneur and investor Peter Thiel shows how we will find singular ways to make those new things Imran Manzoor begins with the contrarian premise that we sleep in an age of technological stagnation albeit we re too distracted by shiny mobile devices to note Information technology has improved rapidly but there s no reason why progress should be limited to computers or Silicon Valley Progress are often achieved in any industry or area of business It comes from the foremost important skill that each leader must master learning to think for yourself Doing what somebody else already knows the way to do takes the planet from 1 to n adding more of something familiar But once you do something new you go from 0 to 1 subsequent Gates won t build an OS subsequent Larry Page or Sergey Brin won t make an enquiry engine Tomorrow s champions won t win by competing ruthlessly in today s marketplace they re going to escape competition altogether because their businesses are going to be unique Zero to Master presents directly an optimistic view of the longer term of progress in America and a replacement way of brooding about innovation it starts by learning to ask the questions that lead you to seek out value in unexpected places *Observing the User*
