Practical Urology In Spinal Cord Injury Clinical Practice In Urology:

Practical Urology in Spinal Cord Injury Keith F. Parsons, John M. Fitzpatrick, 1991 In keeping with the aims of other books in this Series the Editors have concentrated on the practical aspects of management in this case of the urinary tract in patients with spinal cord injury It is well accepted that the management of such patients is best done by those with special experience in this field Nevertheless it is essential that urologists should be well informed on matters relating to the neuropathic urinary tract since not all patients will be managed in special centres and whether their problems are acute or chronic the wrong clinical decision can lead them into a lifetime of problems The plan of this book is directed towards examining particular problems and providing definitive answers Even in this enlightened age of medical progress there are many clinical situations where there is often a choice of treatment Readers of this Series will be aware that despite an apparent abundance of information on a topic it is sometimes not possible to reach a firm conclusion on a management problem Keith Parsons and John Fitzpatrick are to be congratulated on ensuring that for this subject there are good clear guidelines The data in the book are up to date and the excellent approach to the subject makes it a valuable addition to Clinical Practice in Urology
