Practicing Psychiatry In The Community:

Practicing Psychiatry in the Community Jerome V. Vaccaro, Gordon H. Clark, 1996 Today's rapidly changing mental health care environment has created both complex challenges and unique opportunities for the community psychiatrist. *Practicing Psychiatry in the Community: A Manual* is an indispensable resource for practitioners and psychiatric residents. Clinically active psychiatrists will find this manual invaluable as they adopt new roles in this dynamic and exciting field. This comprehensive work by leading experts in the field addresses the major issues currently facing community psychiatrists. It even includes a user-friendly guide to the development of a research program in a community setting. Organized into three main sections, this manual provides essential information on treatment settings, target populations, and special topics in the community psychiatry domain. The Treatment Continuum explores the varied environments in which community psychiatric services may be offered, including outpatient treatment, crisis resolution services, and psychiatric rehabilitation programs. Populations such as mentally disordered children, adolescents, and the elderly, HIV-infected patients, the homeless, mentally ill, the developmentally disabled, chemically dependent patients, dually diagnosed patients, violent patients, and the chronically mentally ill have unique needs requiring skilled clinical care. The Target Populations section provides the community psychiatrist with useful and practical guidelines for the treatment of each of these patient groups. The Special Topics section ushers the community psychiatrist into the era of contemporary community psychiatric practice with vital information on emerging issues like cultural diversity, the principles of effective collaboration with advocacy and family self-help groups, the role of the multidisciplinary team, and legal and training issues.

Each chapter is written by prominent early career psychiatrists from around the world, offering relevant and timely advice to those who are newly qualified as well as a global perspective on the practical issues faced today. Covering a variety of topics from Psychiatric Emergencies to Ethics and clinical practice in psychiatry, chapters include vignettes of scenarios that may be encountered, making this book pertinent and easily applicable to many early career situations. Skills related to personal management and managing resources are often not taught during training but are key to establishing a career in psychiatry; this book will help the new clinician to develop professionally.
