

A photograph of a sunset over the ocean. The sky is a gradient of orange and yellow, with the sun low on the horizon. The water is dark with a reflection of the sunset. In the foreground, there are dark, silhouetted rocks. A large, semi-transparent black rectangle with a thin yellow border is centered over the image, containing a quote in white text.

I kept returning to this new and bizarre question: is there anything that actually is as it seems? Is anything perceptually straightforward? Maybe that's inherently impossible, because impressions are, by their very nature, cumulative – the sum of all your interactions with and perceptions of things.
