International Perspectives on the Teaching and Learning of Geometry in Secondary Schools Patricio Herbst, Ui Hock Cheah, Philippe R. Richard, Keith Jones, 2018-04-27 This book presents current perspectives on theoretical and empirical issues related to the teaching and learning of geometry at secondary schools It contains chapters contributing to three main areas A first set of chapters examines mathematical epistemological and curricular perspectives A second set of chapters presents studies on geometry instruction and teacher knowledge and a third set of chapters offers studies on geometry thinking and learning Specific research topics addressed also include teaching practice learning trajectories learning difficulties technological resources instructional design assessments textbook analyses and teacher education in geometry Geometry remains an essential and critical topic in school mathematics As they learn geometry students develop essential mathematical thinking and visualization skills and learn a language that helps them relate to and interact with the physical world Geometry has traditionally been included as a subject of study in secondary mathematics curricula but it has also featured as a resource in out of school problem solving and has been connected to various human activities such as sports games and artwork Furthermore geometry often plays a role in teacher preparation undergraduate mathematics and at the workplace New technologies including dynamic geometry software computer assisted design software and geometric positioning systems have provided more resources for teachers to design environments and tasks in which students can learn and use geometry In this context research on the teaching and learning of geometry will continue to be a key element on the research agendas of mathematics educators as researchers continue to look for ways to enhance student learning and to understand student thinking and teachers decision making **A Full Axiomatic Development of High School Geometry** David M. Clark, Samrat Pathania, 2023-02-13 This textbook provides a full and complete axiomatic development of exactly that part of plane Euclidean geometry that forms the standard content of high school geometry It begins with a set of points a measure of distance between pairs of points and ten simple axioms From there the notions of length area and angle measure along with congruence and similarity are carefully defined and their properties proven as theorems It concludes with a proof of the consistency of the axioms used and a full description of their models It is provided in guided inquiry inquiry based

format with the intention that students will be active learners proving the theorems and presenting their proofs to their class with the instructor as a mentor and a guide The book is written for graduate and advanced undergraduate students interested in teaching secondary school mathematics for pure math majors interested in learning about the foundations of geometry for faculty preparing future secondary school teachers and as a reference for any professional mathematician It is written with the hope of anchoring K 12 geometry in solid modern mathematics thereby fortifying the teaching of secondary and tertiary geometry with a deep understanding of the subject *The Learning and Teaching of Geometry in Secondary Schools* Pat Herbst,Taro Fujita,Stefan Halverscheid,Michael Weiss,2017-03-16 IMPACT Interweaving Mathematics Pedagogy and Content for Teaching is an exciting new series of texts for teacher education which aims to advance the learning and teaching of mathematics by integrating mathematics content with the broader research and theoretical base of mathematics education The Learning and Teaching of Geometry in Secondary Schools reviews past and present research on the teaching and learning of geometry in secondary schools and proposes an approach for design research on secondary geometry instruction Areas covered include teaching and learning secondary geometry through history the representations of geometric figures students cognition in geometry teacher knowledge practice and beliefs teaching strategies instructional improvement and classroom interventions research designs and problems for secondary geometry Drawing on a team of international authors this new text will be essential reading for experienced teachers of mathematics graduate students curriculum developers researchers and all those interested in exploring students study of geometry in secondary schools
