**National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1971      **Science and Religion** Yiftach Fehige,2016-02-12 This volume situates itself within the context of the rapidly growing interdisciplinary field that is dedicated to the study of the complex interactions between science and religion It presents an innovative approach insofar as it addresses the Eurocentrism that is still prevalent in this field At the same time it reveals how science develops in the space that emerges between the local and the global The volume examines a range of themes central to the interaction between science and religion Eastern thought within Western science and religion and vice versa and revisits thinkers who sought to integrate Eastern and Western thinking It studies Zen Buddhism and its relation to psychotherapy Islamic science Vedantic science atheism in India and Darwinism offering in turn new perspectives on a variety of approaches to nature Part of the Science and Technology Studies series this volume brings together original perspectives from major scholars from across disciplines and will be of great interest to scholars and students of science and technology studies history of science philosophy of science religious studies and sociology      *Newtons Werk* FAUVEL,FLOOD,SHORTLAND,WILSON,2013-11-11

**"On Second Thought" and Other Essays in the History of Medicine and Science** Owsei Temkin,2002-01-11 Over the course of a career spanning most of the twentieth century distinguished historian Owsei Temkin has argued passionately for the necessity of chronicling and analyzing the history of medicine The essays presented in this book span Dr Temkin s career bringing together new pieces and many previously unavailable outside the journals in which they were originally published Here the reader will find new thoughts and ideas that deviate from Dr Temkin s earlier beliefs and reflect a lifetime of research into the historical and ethical foundations of modern medicine      *Science and Change 1500-1700* Hugh Kearney,1971      *Science and Change 1500-1700* Hugh F. Kearney,1979      **The Soul of Science** Nancy Pearcey,Charles B. Thaxton,1994 I consider *The Soul of Science* to be a most significant book which in our scientific age should be required reading for all thinking Christians and all practicing scientists The authors demonstrate how the flowering of modern science depended upon the Judeo Christian worldview of the existence of a real physical contingent universe created and held in being by an omnipotent personal God with man having the capabilities of rationality and creativity and thus being capable of investigating it Pearcey and Thaxton make excellent use of analogies to elucidate difficult concepts and the clarity of their explanations for the nonspecialist for example of Einstein s relativity theories or of the informational content of DNA and its consequences for theories of prebiotic evolution are quite exceptional alone making the volume worth purchasing Dr David Shotton Lecturer in Cell Biology Department of Zoology University of Oxford Pearcey and Thaxton show that the alliance between atheism and science is a temporary aberration and that far from being inimical to science Christian theism has played and will continue to play an important role in the growth of scientific understanding This brilliant book deserves wide readership Phillip E Johnson University of California Berkeley This book would be an excellent text for courses on science

and religion and it should be read by all Christians interested in the relationship between science and their theological commitments J P Moreland Professor of Philosophy Talbot School of Theology Biola University     **The History of Mathematics** David M. Burton,1997 This text concentrates on the history of those topics typically covered in an undergraduate curriculum or in secondary schools It presents a full account of how mathematics has developed over the last 5000 years and assorted problems of varying degrees of difficulty have been interspersed throughout the text

**Between Orthodoxy and the Enlightenment** Michael Heyd,1983-01-31     Rebuilding the Matrix Denis Alexander,2001 This is a review of the West s key debates on science and religion over the last century and a half It includes discussions on the science religion debate science in the 19th century and science faith and secularization     The Journal of Mind and Behavior ,1980     The Inner Dimension Jonathan Shear,1990 The Inner Dimension examines the philosophical significance of a remarkable family of experiences central to Eastern philosophical and meditation traditions and reported by creative geniuses in the West from Plato through Einstein Empirical research on ordinary people practicing traditional Eastern meditation techniques now indicates that these otherwise rarely encountered experiences actually reflect widely accessible universal potentials of ordinary human awareness The Inner Dimension responds to this research by exploring the significance of these experiences for a wide range of philosophical issues self knowledge mind and matter creativity values and human potential as articulated by major Western philosophers such as Plato Descartes Hume Kant Mill and Wittgenstein Its analyses and approach throughout are straightforwardly empirical and non metaphysical Its implications however are revolutionary     Geologists and the History of Geology: Bibliography William Antony S.
