## Science Morality And Feminist Theory:

**Science, Morality & Feminist Theory** Marsha P. Hanen, Kai Nielsen, 1987 *Das Europa Lateinamerikas* Christoph Strosetzki, 1989 **Feminist Ethics** Claudia Card, 1991 Fifteen essays address subjects ranging from the history of feminist ethics to the logic of pluralist feminism and present feminist perspectives on such topics as terrorism bitterness women trusting other women and survival and ethics Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR *Science, Morality and Feminist Theory* Lorraine B. Code, 1987 **Ethics and Morality in Feminism** Sandra Krol, 1992 Bibliografie samengesteld in het kader van het research programma Gender moraal en Zorg van de afdeling Vrouwenstudies Sociale Wetenschappen Universiteit Utrecht Moral Contexts Margaret Urban Walker, 2002-11-23 Many contexts shape and limit moral thinking in philosophy and life Human conditions of vulnerability and interdependency of limited awareness and control of imperfect insight into ourselves and others are inevitable contexts that neither moral thought nor theory should forget To be truly reflective moral thinking and moral philosophy must become aware of the contexts that bind our thinking about how to live This collection of essays by Margaret Urban Walker seek to show how to do this and why it makes a difference Contingent and changeable contexts that shape moral thinking include our individual histories our social positions and institutional roles relationships cultural settings and social arrangements and the specific moral idioms we pick up along the way The paradigms and specialized language of ethical theory are contexts too they shape how moral theory looks and what or whom it looks at Ethical theory and practice are meaningless without these Moral Contexts **Information Ethics** Adam Daniel Moore, 2012-09-01 This anthology focuses on the ethical issues surrounding information control in the broadest sense Anglo American institutions of intellectual property protect and restrict access to vast amounts of information Ideas and expressions captured in music movies paintings processes of manufacture human genetic information and the like are protected domestically and globally The ethical issues and tensions surrounding free speech and information control intersect in at least two important respects First the commons of thought and expression is threatened by institutions of copyright patent and trade secret While institutions of intellectual property may be necessary for innovation and social progress they may also be detrimental when used by the privileged and economically advantaged to control information access consumption and expression Second free speech concerns have been allowed to trump privacy interests in all but the most egregious of cases At the same time our ability to control access to information about ourselves what some call informational privacy is rapidly diminishing Data mining and digital profiling are opening up what most would consider private domains for public consumption and manipulation Post 9 11 issues of national security have run headlong into individual rights to privacy and free speech concerns While constitutional guarantees against unwarranted searches and seizures have been relaxed access to vast amounts of information held by government agencies libraries and other information storehouses has been restricted in the name of national security *Information Ethics* Adam D. Moore, 2005

This anthology which focuses on the ethical issues surrounding free speech and information control includes writings by Aristotle John Stuart Mill and Immanuel Kant as well as expert 20th and 21st century commentators on aspects of the current debate

**On Feminist Ethics and Politics** Claudia Card,1999 For years mainstream feminist ethics focused criticism on male supremacy Feminist philosophers in this volume adopt a less male focused stance to look closely at oppression s impact on women s agency and on women s relations with women Examining legal social and physical relationships these philosophers confront moral ambiguity moral compromise and complicity in perpetuating oppression Combining personal experience with philosophical inquiry they vividly portray their daily engagement with oppression as both victims and perpetrators They explore such issues as how pornography silences women and radical feminist politics complicity in racism Among these insightful essays Sandra Bartky argues that women share guilt for racism when they benefit from it without protest Susan Brison reflects on uses of narrative in trauma recovery from such experiences as being targeted for rape or murder Joan Callahan examines fallout of derogatory speech directed at lesbians Virginia Held proposes carrying care into marketplaces and governments and in her introduction Claudia Card draws on Primo Levi s conception of gray zones in exploring dangers of character damage to victims of misogyny A fitting companion to Card s highly regarded *Feminist Ethics* this volume interweaves observations on character political ethics violence and love into an accessible sourcebook for students It tackles some of feminism s most pressing issues and helps readers to identify and then overcome the real damage caused by oppression

*Feminism, Animals, and Science* Lynda I. A. Birke,1994 What we think other animals are matters to how we see ourselves how similar are they or how different Do humans belong to culture and animals or women to nature For feminists that matters particularly for it has so often been animal names that have been used to derogate women This book explores these boundaries focusing particularly on feminist analyses of science science not only uses animals but also names and defines them Beginning with some ways in which animals are defined and with feminist concerns about non humans as fellow sufferers the book goes on to look at how ideas about animals are constructed in different areas of biological science and how these intersect with feminist critiques of modern science

*The Philosophy of (erotic) Love* Robert C. Solomon,Kathleen Marie Higgins,1991 Solomon and Higgins have chosen excerpts from the great philosophical texts and combined them with the most exciting new work of philosophers writing today It examines the mysteries of erotic love from a variety of philosophical perspectives and provides an impressive display of wisdom that the world s best thinkers have brought and continue to bring to the study of love

*Feministische philosophie* Marion Heinz,Sabine Doyé,1996

**Jenseits der Geschlechtermoral** Herta Nagl-Docekal,1993 **Feminist Ethics** Moira Gatens,1998 **Die Philosophin** ,2002 **Philosophy & Feminism** Andrea Nye,1995 In complex and lucid prose Nye then moves methodically through the major contemporary fields in philosophy logic ethics epistemology philosophy of language and political theory in order to demonstrate the ways in which contemporary feminist thought is challenging basic presuppositions in each of these

fields In every case she offers fair and articulate summaries of the major debates for and against incorporating feminist perspectives in mainstream philosophy while presenting compelling arguments for her own vision of the crucial role that feminist philosophy should play in transforming her discipline      **Norms and Values** Joram Graf Haber, Mark S.

Halfon, 1998 Virginia Held best known for her book *Rights and Goods* has made her mark in the fields of ethics feminist philosophy and social and political thought These essays by leading philosophers range over all these areas While each stands alone the essays together demonstrate the lasting value of Held's work to the field      **Revue Canadienne de**
