Autism in a Decentered World Alice Wexler, 2016-01-29 Autistic people are empirically and scientifically generalized as living in a fragmented alternate reality without a coherent continuous self In Part I this book presents recent neuropsychological research and its implications for existing theories of autism selfhood and identity challenging common assumptions about the formation and structure of the autistic self and autism's relationship to neurotypicality Through several case studies in Part II the book explores the ways in which artists diagnosed with autism have constructed their identities through participation within art communities and cultures and how the concept of self as story can be utilized to better understand the neurological differences between autism and typical cognition This book will be of particular interest to researchers and scholars within the fields of Disability Studies Art Education and Art Therapy

Moral Spectatorship Lisa Cartwright, 2008-03-18 Lisa Cartwright contributes to feminist film theory by developing a new psychoanalytic theory of spectatorship and human subjectivity

Learning and Cognition in Autism Eric Schopler, Gary B. Mesibov, 2013-06-29 This volume like the other eight in the Current Issues in Autism series grew from our annual TEACCH conference The book is not however simply a compilation of conference proceedings Instead selected conference participants whose work has already achieved national and international recognition were asked to develop chapters around their presentations Other recognized experts in areas relevant to the conference theme were also asked to contribute chapters Although we were not able to include all of the workers who have contributed to the theme this volume represents our best effort to pull together for our readers the most current knowledge and state of the art practices Although aspects of cognition learning and behavioral motivation have been touched on for relevance to autism in other books in this series the growing integration of behavioral and cognitive theories has greatly enriched our educational interventions on behalf of autism While this volume does not include all the fascinating facets of this recent integration we believe that it offers useful information to teachers parents and researchers on some of the progress produced by their interaction
