Plummer, 2003-01-01 The intriguing and provocative results on the effects of the single European market and NAFTA make this short book worth a read even if one is concerned only with how developing countries have been affected by regional trade agreements that do not include them Peter J Montiel Journal of Regional Science This book is an excellent attempt to pin down the effects of regional economic integration on developing countries it will prove to be a good guide for researchers and students of development economics working in the area of regional trading arrangements and policymakers and governments which are in the process of exploring the possibilities of forming free trade areas Pravakar Sahoo Development Policy Review Students interested in either the methodological issues inherent in research on trade or on the economics of trading blocs in general would profit from the book James J Hentz The European Journal of Development Research Questions related to the economics of regionalism became increasingly important beginning in the late 1980s when regional groupings started to become very popular as a tool of commercial policy The goal of this book is to address the question of whether or not regionalism in developed countries has truly benefited developing countries and to what degree regionalism among developing countries and between developed and developing countries will improve economic development prospects Mordechai Kreinin and Michael Plummer consider the implications of the emerging global trend of economic regionalism for developing countries The analysis focuses on the trade and investment effects of integration in developed countries on developing countries as well as the ramifications of regional integration in the latter After an extensive review of the theoretical and empirical literature pertinent to the economics of regionalism the book considers the ex post trade and direct foreign investment effects of the Single Market Program in Europe and NAFTA followed by chapters on ASEAN and economic integration in Latin America primarily MERCOSUR The study suggests three salient conclusions First in designing preferential trading arrangements developed countries should recognize and attempt to minimize the possible discriminating effect on developing countries Second the developing countries have an abiding interest in the success of WTO negotiations that would minimize the discrimination against them of regional groupings in Europe and North America And third any customs unions or free trade areas among the developing countries themselves should be outward looking if they are to enhance the welfare of developing countries Economists and policy scholars as well as readers interested in regionalism and economic development will find this book a great resource

The Development Trinity Amelia U. Santos-Paulino, Alisa DiCaprio, Maria Sokolova,2020 Developing countries today have become more active participants in regional trade agreements This raises questions about how the benefits of integration are distributed and the extent to which lower income countries are able to capture development gains Historically such impacts have been difficult to identify with precision This paper seeks to address this gap by empirically analysing the impact of regional integration on development particularly the effects on growth and welfare Using both bilateral and regional integration measures we show that the ability to capture gains from integration varies across developing country regional groups with developing Asia benefiting on par with developed countries The findings in the paper indicate that trade and trade policy play an important role in reducing inequality and poverty in developing countries It also shows that regionalism can function as a channel to make multilateralism a more adept way of addressing national challenges

Integration Elias T. Ayuk, Samuel T. Kaboré, 2013-10-22 Could regional integration be a first step toward joining the global market In a context where liberalizing trade has not produced the expected gains in developing countries and growth in global trade has not led to the expected economic growth an alternative solution has emerged This new paradigm suggests that trade liberalization should be accompanied by public investment However by its very nature trade liberalization leads to a reduction in revenues from duties and taxes which means that the available resources for public investments will also be reduced There are now solid arguments for encouraging the less developed countries to first emphasize regional integration before trying to access the global market This book explores the issues linked to regional integration in West Africa and presents empirical data about the experiences in West African Economic and Monetary Union WAEMU countries to converge their economies It also examines how these efforts which make a major contribution to regional integration influence poverty reduction in the economic and monetary community It will be of interest to researchers working in this area Elias T Ayuk is Director of the United Nations University Institute for Natural Resources in Africa in Accra Ghana and was formerly a senior program specialist at the International Development Research Centre Samuel T Kabor is a researcher lecturer at the Faculty of Economics and Management at the University of Ouagadougou II Burkina Faso Canada s International Development Research Centre IDRC supports research in developing countries to promote growth and development IDRC also encourages sharing this knowledge with policymakers other researchers and communities around the world The result is innovative lasting local solutions that aim to bring choice and change to those who need it most Elias T Ayuk is Director of the United Nations University Institute for Natural Resources in Africa in Accra Ghana and was formerly a senior program specialist at the International Development Research Centre Samuel T Kabor is a researcher lecturer at the Faculty of Economics and Management at the University of Ouagadougou II Burkina Faso Canada s International Development Research Centre IDRC supports research in developing countries to promote growth and development IDRC also encourages sharing this knowledge with policymakers other researchers and communities around the world The result is innovative lasting local solutions that aim to bring choice and change to those who need it most
