Regions In Question Space Development Theory And Regional Policy:

Regions in Question (Routledge Revivals) Charles Gore, 2013-12-19 Originally published in 1984 Regional development planning has grown rapidly in recent years as both an academic specialism and a focus of policy and practice Books and articles on the subject have proliferated and all across the Third World governments have become committed to it setting up large new departments and even ministries Charles Gore argues that this growing popularity of regional planning in developing countries is profoundly paradoxical

Regions in Question Charles G. Gore, 1984 **Regions in Question: Space Development Theory and Regional Policy** Charles Gore, 1984 **Regions in Question** Charles Gore, 1992

Handbook on Entropy, Complexity and Spatial Dynamics Reggiani, Aura, Schintler, Laurie A., Czamanski, Danny, Patuelli, Roberto, 2021-12-14 This ground breaking Handbook presents a state of the art exploration of entropy complexity and spatial dynamics from fundamental theoretical empirical and methodological perspectives It considers how foundational theories can contribute to new advances including novel modeling and empirical insights at different sectoral spatial and temporal scales

Spaces and Places in Central and Eastern Europe Gyula Horváth, 2014-08-21 Across Europe there is a rapidly changing context for undertaking regional development In the 20th century development of the former planned economies Bulgaria Czech Republic Hungary Poland Romania and Slovakia was defined by these countries differences rather than their common ideological roots These disparities altered over time and were marked by changing social structures However the ranking of regions has remained the same as core areas have strengthened their positions while the structural obstacles to the modernisation of peripheral areas have remained due to a lack of coherent regional policy This book examines the specific regional development paths of Central and Eastern European countries and evaluates the effects of the determining factors of this process Through analysis of the system of objectives instruments and institutions used in different eras and case studies of Hungary East Germany and Germany development models are established and compared with Western European patterns The book summarises the experiences of Central and Eastern European regional cooperation and examines the basic nature of the cohesion problems of the Carpathian Basin trans national macro region It confirms by comparative historical analyses that the transformation was indeed unique This book will make a welcome addition to the literature for students and academics interested in the broader picture of Central and Eastern European politics future integration within the European Union and the history of regional development processes Jahrbuch der Geographischen Gesellschaft von Bern, 1986

Politics Virginie Mamadouh, 2017-05-15 Depending on the breadth or narrowness of the understanding of politics and the political politics in human geography is defined as either the operation of power in all social relations or the workings of power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas

in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale social movements and electoral participation and identities and citizenship

Regionalism after Regionalisation Frans Schrijver, 2025-10-01 Throughout Europe regionalist movements claim more autonomy for their region pointing at cultural and historical distinctiveness and the demands of their populations In some places violence is used to put pressure on the state and in many states in Europe and elsewhere the issue of regional minorities figures prominently on political agendas Over the last few decades many states have introduced regional governments and parliaments often as an answer to regionalist demands with a view of making regionalist movements redundant and satisfying most of their supporters Others have warned that this was a step towards fragmentation and even the break up of nation states

Regionalism after Regionalisation presents a response to this debate Concentrating on three countries Spain France and the United Kingdom and three regional case studies of Galicia Brittany and Wales this book offers an analysis of the development of political regionalism after regionalisation It examines the ways in which regionalisation influences the institutionalisation of a region and the establishment of regional identities It explains how the introduction of regional governments and elections alters the conditions in which claims for a regionalist project are put forward and in which ways it effects public demands for regional autonomy This study analyses whether regionalisation is accepted as a sufficient answer to those demanding political and cultural autonomy and how political actors from regionalist and mainstream political parties deal with new regional political institutions as opportunities to mobilise support

Canada and the Global Economy John N.H. Britton, 1996-05-01 The contributors explore four central themes the locational impacts of the openness of the Canadian economy Canada's relatively simple economic geography in terms of regional variations in resources and urban development the problems of keeping pace with rapid advances in technology and the role of government in maintaining a national market and assisting economic development They outline the essential elements of Canada's contemporary economic geography highlight the origins and spatial imprint of change in the Canadian economy and provide an assessment of Canada's participation in significant international patterns of economic change Canada and the Global Economy is concerned not only with the economic size and location of consumption and production but also with institutional changes and shifts in employment the sectoral composition of economic activity and the organizational structure and locational behaviour of particular industries and firms Special attention is given to the technological development of both established industries and new service and manufacturing activities A timely addition to the field it provides a geographic perspective on significant changes in jobs and types of work that result from the transformation of economic activities

Regionalism in Europe Michael Keating, 2004 The last half century has seen the rise across Europe of a new intermediate level of government and politics usually referred to as a region However the term region means many different things and can be approached from many different angles geographical historical cultural social economic and political Although it is in Europe that regionalism as a multiform phenomenon has developed furthest the European experience resonates in other parts of the world where some of these elements also exist In this volume Michael Keating has selected some of the most significant previously published articles which provide a comprehensive overview of past and current thinking on this subject
