Regulating International Business Through Codes Of Conduct:

Regulating International Business Through Codes of Conduct Raymond J. Waldmann, 1980 Regulating International Business Sol Picciotto, Ruth Mayne, 2016-07-27 This timely book points the way towards a new positive regulatory framework for international investment following the failure of the Multilateral Agreement on Investment MAI. It examines the flaws in free market strategies underpinning the recent phase of globalization in particular drawing out the lessons from the MAI which was suspended in October 1998. The authors explore an alternative based on a positive regulatory framework for international business aimed at maximizing the positive contribution to development of foreign investment and minimizing its negative social and environmental impacts. The contributors include academics, researchers for non-governmental organizations and business and trade union representatives writing from a combination of economic, legal and political perspectives. The book combines academic analysis with grass roots and practical experience and suggests concrete policy proposals.

Regulating Multinationals in Developing Countries Edwin Mujih, 2012 Edwin Mujih explores the difficulties associated with regulating multinational companies operating in developing countries and highlights the need to establish an international legally binding framework to ensure that they operate in a socially responsible manner. *Regulating Multinationals in Developing Countries* features a study of the Chad and Cameroon oil and pipeline project that highlights the regulatory problems in countries that have neither the capacity or will to effectively regulate those operating within their borders. This is the first title in Gower's Corporate Social Responsibility Series to approach CSR from a legal perspective; it provides insight into problems with weak regulatory regimes and poses questions about the fundamental nature of multinational corporations and about different notions of CSR itself.

Corporate Governance Saleem Sheikh, 2002-03-20 This book critically considers the relationship between directors, shareholders and auditors in the corporate governance system. Traditionally, company law has been primarily based on this tripartite relationship. This book comprises a series of contributions from authors who argue that there are wider interests which British company law has largely ignored. These include the interests of creditors, employees, consumers, suppliers and the general public. The concept of corporate governance is examined with comparative references to the USA and Canada. Particular reference is made to the Cadbury Committee and its implications for future company law reform. The ethical and sociological dimensions of corporate governance are also fully discussed.

Corporate Environmental Accountability in International Law Elisa Morgera, 2020-09-03 This fully updated second edition of *Corporate Accountability in International Environmental Law* examines systematically all international sources of corporate accountability standards with specific reference to environmental protection and elaborates on their theoretical and practical implications for international environmental law. The book argues that although international environmental law does not bind multinational corporations and other business entities, growing practice points to the emergence and consolidation of international legal standards. These standards allow

adapting and translating inter State obligations embodied in international environmental law into specific normative benchmarks to determine the legitimacy of the conduct of the private sector against internationally recognized values and rules The role of international organizations who in the absence of State intervention identify and promote the application of selected international environmental standards is analyzed in depth This analysis demonstrates how these international organizations are a driving force in establishing and operationalizing international standards for corporate environmental accountability The new edition includes a recent assessment of the Rio 20 Summit analysis of the UN Framework on Business and Human Rights and the 2012 Performance Standards It contains a discussion on the role of fair and equitable benefit sharing under the Convention on Biological Diversity and international human rights law and analysis of the monitoring practice of the UN Special Rapporteur on Indigenous Peoples Rights This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is offered as a free PDF download from OUP and selected open access locations
