Yom, 2015-12-01 Based on comparative historical analyses of Iran Jordan and Kuwait Sean L Yom examines the foreign interventions coalitional choices and state outcomes that made the political regimes of the modern Middle East A key text for foreign policy scholars From Resilience to Revolution shows how outside interference can corrupt the most basic choices of governance who to reward who to punish who to compensate and who to manipulate As colonial rule dissolved in the 1930s and 1950s Middle Eastern autocrats constructed new political states to solidify their reigns with varying results Why did equally ambitious authoritarians meet such unequal fates Yom ties the durability of Middle Eastern regimes to their geopolitical origins At the

dawn of the postcolonial era many autocratic states had little support from their people and struggled to overcome widespread opposition When foreign powers intervened to bolster these regimes they unwittingly sabotaged the prospects for long term stability by discouraging leaders from reaching out to their people and bargaining for mass support early coalitional decisions that created repressive institutions and planted the seeds for future unrest Only when they were secluded from larger geopolitical machinations did Middle Eastern regimes come to grips with their weaknesses and build broader coalitions

Sustainable Prosperity in the Arab Gulf Jarmo T. Kotilaine, 2023-08-16 Tracing the development journey of the Arabian Gulf region with a forward looking perspective this book describes how a combination of good fortune creative experimentation and determination has enabled the region to achieve prosperity Today the Arabian Gulf is well positioned to assume a pivotal role in the new global order Forced to balance an extreme climate and acute resource constraints but also an exceptional location the region's progress and prosperity have historically been precarious and vulnerable to external shocks Efforts to transcend resource dependency have typically involved proactive attempts to enable other economic activities This book argues that while conventional economic diversification is making headway the Gulf region is in fact amidst a far more holistic transformation that positions it for a pivotal role in the emerging multipolar global order It now offers globally competitive regulations and world class infrastructure at the heart of the Old World flanked by two fast growing continents It has become the hub of choice for a growing share of inter continental flows of people trade and capital and has established strong economic ties in all directions This book shows how despite many risks and challenges the region possesses the forward looking vision and necessary resilience that can finally liberate it from its long standing resource curse and a development paradigm that looks likely to provide the foundation for sustained well being in the decades ahead The scope and rigor of the book make it suitable as a reference on the Arabian Gulf and for those interested in global affairs and economic development as well as policymakers and the business community
