Reimagining Global Health Paul Farmer, Arthur Kleinman, Jim Kim, Matthew Basilio, 2013-09-07 Bringing together the experience perspective and expertise of Paul Farmer Jim Yong Kim and Arthur Kleinman Reimagining Global Health provides an original compelling introduction to the field of global health Drawn from a Harvard course developed by their student Matthew Basilio this work provides an accessible and engaging framework for the study of global health Insisting on an approach that is historically deep and geographically broad the authors underline the importance of a transdisciplinary approach and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems The case studies presented throughout Reimagining Global Health bring together ethnographic theoretical and historical perspectives into a wholly new and exciting investigation of global health The interdisciplinary approach outlined in this text should prove useful not only in schools of public health nursing and medicine but also in undergraduate and graduate classes in anthropology sociology political economy and history among others *The Workbook* ,1990

Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur ,2003 **The Quest** ,1995 Earth & Spirit Fritz Hull,1993 **Negotiations of the "new World"** Sabine Selchow,2017 In this book I develop the argument that the omnipresence of the contemporary adjective global is more than a linguistic curiosity I argue it is a political phenomenon and as such a valuable albeit unconventional object of study for scholars outside the linguistics discourse I argue that the omnipresence of the contemporary adjective global constitutes the discursive reproduction of a web of meanings that is best labelled new world As such the omnipresence of the contemporary adjective global constitutes a distinct dimension of the enduring contestation over the construction of the world Given the word's current popularity and unscrutinised existence as well as the loaded nature of the web of meanings new world that it brings out I argue this dimension is not just a minor matter but plays an important hence research worthy role in the contemporary symbolic struggle over the world My conceptualisation of the omnipresence of the contemporary adjective global as the reproduction of a web of meanings new world is grounded in two central insights that arise from my empirical engagement with the adjective global The first of these two insights is the empirically grounded understanding that the contemporary adjective global is closely enmeshed with the talk about different ideas associated with the word globalisation I call this talk globalisation discourse As I demonstrate the contemporary adjective global has come to be used in the sense of outcome of globalisation This makes the adjective a new word What is new about the contemporary global I argue is that it implies ideas that are associated with the word

globalisation I develop my argument that the contemporary adjective global is best be taken as a new word by building on relevant discussions among lexicographers about when a word is appropriately called new as well as by drawing on a theory of language and meaning according to which language and meaning are not natural and referential but conventional and productive. The second central insight that arises from my empirical engagement with the contemporary global and that underlies my conceptualisation of the omnipresence of global as the re production of a web of meanings new world refers to the word globalisation. It is the insight that all utterances which contain the word globalisation can be seen as constituting a discursive production of an object that is best labelled new world. In other words my conceptualisation of the omnipresence of global builds on my understanding that what all uses of the word globalisation have in common despite and in addition to the myriad of meanings that are associated with this word in whichever context it is used is that they imply the proclamation of a new world that came. This insight makes what I call globalisation discourse different from existing conceptualisations under this label such as the one by Hay and Smith 2005. Normally the globalisation discourse is conceptualised based on a scholarly preconception of what the word globalisation refers to such as market integration or the spread of neoliberalism. In contrast my suggestion that we understand the uses of the word globalisation as a discursive production of a web of meanings that is best called new world is grounded in an approach that takes the polysemy of the word globalisation seriously. In addition it builds on an elaboration of the question how and when the concept s globalisation and the neologism globalisation came to be in the true Foucault 1981: 61 i.e. became socially accepted and normal tools to grasp the world. As I discuss in this book developments which have come to be addressed with the word globalisation existed before this neologism became popular at the end of the 1980s and in the course of the 1990s. Given that meaning is not inherent in social reality but conventional the question arises why a new word was perceived to be needed and accepted at the end of the 1980s and 1990s i.e. at that particular moment in time. My answer to this question is that this was because the end of the Cold War was perceived to have brought out a new world for which existing conceptual tools were perceived to be inadequate. This new world was perceived as having produced a conceptual vacuum. This is apparent in assessments such as that of IR theorist James N. Rosenau 1990: 5 who argued after the end of the Cold War that observers were left without any paradigms or theories that adequately explain the course of events. I argue it was this perceived vacuum that opened the discursive door and let the concept s globalisation and the neologism globalisation step in to fill it. Consequently the use of the word globalisation can be conceptualised as re producing and filling the conceptual space new world with meaning. It is the synthesis of these two insights that allows me to conceptualise the omnipresence of the contemporary adjective global as a distinct phenomenon namely as a discursive re production of a web of meanings called new world. This phenomenon I argue in this book is relevant and interesting in two respects. *New Statesman*, 1996. [The Skills Advantage](#) Anish Lalchandani, 2024-05-08. Reimagining Education. A Case for a New Approach to Educational Leadership in a Pandemic Junior Martin, 2022-03-31 Academic Paper from the year 2022 in the subject Pedagogy School Pedagogics grade higher education course Educational Leadership language English abstract In the Caribbean school closures have left 7 million learners and over 90 000 teachers across 23 countries and territories struggling to identify sustainable responses to the catastrophe caused by the covid 19 pandemic Academic leaders across the world have responded to the crisis by closing institutions canceling face to face activities and moving their educational and related activities online Academic leaders are therefore expected to play a crucial role in the management of an appropriate response to the crisis at their institutions While institutions are forced to function in an environment of uncertainty and growing intensity of the novel coronavirus pandemic academic leaders can be credited with making the decision of shifting towards remote learning Fernandez Shaw 2020 This massive shift towards pivoting to remote learning is a demonstration that academic leaders are resolute in embracing the transformation of academia to a more modern system In the context of this change it is anticipated that the recovery period and beyond will clearly require an evolution of leaders who are more prepared to manage crises while advancing the technology agenda The process of reimagining education therefore is a call for academic leaders to successfully embrace change management master crisis management and demonstrate resilience in an effort to successfully lead the recovery process
