The Economics of Karl Marx Samuel Hollander, 2008-04-07 Presents an account and technical assessment of Marx's economic analysis in Capital with particular reference to the transformation and the surplus value doctrine the reproduction schemes the falling real wage and profit rates and the trade cycle The focus is on criticisms that Marx himself might have been expected to face in his day and age In addition it offers a chronological study of the evolution of that analysis from the early 1840s through three drafts documents of the late 1840s the Grundrisse of 1857 1858 and the Economic Manuscripts of 1861 1863 It also provides three studies in application focusing on Marx's evolutionary orientation in his evaluation of the transition to communism and his rejection of egalitarianism under both capitalist and communist regimes his evolving perspective on the role of the industrial entrepreneur and his evolving appreciation of the prospects for welfare reform within capitalism

Methodological

Misconceptions in the Social Sciences Angelo Fusari, 2014-03-31 This book offers a systematic view of social analysis that will advance the communication of results between different academic disciplines It overcomes misunderstandings that are due to the use of an unstructured variety of methodological traditions in the analysis of complex socioeconomic and political processes The book focuses on the special features of human society humans as subjects non repetitiveness and

irreversibility of social actions and the peculiar relations between necessity and possibility in human action It defines methodological criteria procedures and rules that enable researchers to select and classify realistic hypotheses to derive general principles and basic organizational features It then applies these criteria in critical reviews of major theories and interpretations of society and history offering clarifications and alternative proposals with regard to crucial aspects of anthropological political juridical sociological and religious thought

Routledge Handbook of Ecological Economics Clive L. Spash, 2017-04-07 Since becoming formally established with an international academic society in the late 1980s ecological economics has advanced understanding of the interactions between social and biophysical reality It initially combined questioning of the basis of mainstream economics with a concern for environmental degradation and limits to growth but has now advanced well beyond critique into theoretical analytical and policy alternatives Social ecological economics and

transformation to an alternative future now form core ideas in an interdisciplinary approach combining insights from a range of disciplines including heterodox economics political ecology sociology political science social psychology applied philosophy environmental ethics and a range of natural sciences This handbook edited by a leading figure in the field demonstrates the dynamism of ecological economics in a wide ranging collection of state of the art essays Containing contributions from an array of international researchers who are pushing the boundaries of the field the Routledge Handbook of Ecological Economics showcases the diversity of the field and points the way forward A critical analytical perspective is combined with realism about how economic systems operate and their essential connection to the natural world and society This provides a rich understanding of how biophysical reality relates to and integrates with social reality Chapters provide succinct overviews of the literature covering a range of subject areas including heterodox thought on the environment society power and politics markets and consumption value and ethics science and society methods for evaluation and policy analysis policy challenges and the future post growth society The rich contents dispel the myth of there being no alternatives to current economic thought and the political economy it supports The Routledge Handbook of Ecological Economics provides a guide to the literature on ecological economics in an informative and easily accessible form It is essential reading for those interested in exploring and understanding the interactions between the social ecological and economic and is an important resource for those interested in fields such as human ecology political ecology environmental politics human geography environmental management environmental evaluation future and transition studies environmental policy development studies and heterodox economics
