Quarterly Essay 27 Reaction Time Ian Lowe, 2007-09-01 Australia is at a crossroads if we are to halt global warming do we need to stride resolutely into a nuclear future In this engrossing and persuasive essay Ian Lowe discusses his one time belief in the benefits of nuclear power and explains why that belief has faltered He engages with the leading environmentalists like James Lovelock who advocate going nuclear as well as with the less savoury aspects of the Australian politicking He discusses whether other countries might need to use nuclear power even if Australia doesn't and offers an authoritative survey of Australia's energy alternatives from solar and wind power to clean coal Above all he explains why taking up the nuclear option would be a decisive step in the wrong direction economically environmentally politically and socially Promoting nuclear power as the solution to climate change is like advocating smoking as a cure for obesity That is taking up the nuclear option will make it much more difficult to move to the sort of sustainable ecologically healthy future that should be our goal Ian Lowe Reaction Time

The Rio Declaration on Environment and Development Jorge E. Viñuales, 2015-02-05 The international community has long grappled with the issue of safeguarding the environment and encouraging sustainable development often with little result The 1992 Rio Declaration on Environment and Development was an emphatic attempt to address this issue setting down 27 key principles for the international community to follow These principles define the rights of people to sustainable development and the responsibilities of states to safeguard the common environment The Rio Declaration established that long term economic progress required a connection to environmental protection It was designed as an authoritative and comprehensive statement of the principles of sustainable development law an instrument to take stock of the past international and domestic practice a guide for the design of new multilateral environmental regimes and as a reference for litigation This commentary provides an authoritative and comprehensive overview of the principles of the Declaration written by over thirty interdisciplinary contributors including both leading practitioners and academics Each principle is analysed in light of its origins and rationale The book investigates each principle's travaux préparatoires setting out the main points of controversy and the position of different countries or groups It analyses the scope and dimensions of each principle providing an in depth understanding of its legal effects including whether it can be relied before a domestic or international court It also assesses the impact of the principles on subsequent soft law and treaty development as well as domestic and international jurisprudence The authors demonstrate the ways in which the principles interact with each other and finally provide a detailed analysis of the shortcomings and future potential of each principle This book will be of vital importance to practitioners scholars and students of international environmental law and sustainable development
