Regionalism Among Developing Countries:

Regionalism among Developing Countries S. Page, 1999-11-09 In the last decade regionalism appears to have emerged as a major new force in the world This book puts it in its historical context Regions have emerged before few are old because they either evolve into federal systems or break up The current regions imply more integration than a simple view that they are about liberalising trade The Political Economy of Regionalism and Developing Countries David Robertson, 1992

Analysis of the revival of interest in regionalism in the light of the Uruguay round of the General Agreement on Tariff and Trade talks and the concepts of open trading and protectionism in regionalism **Economic Integration and**

Development Mordechai Elihu Kreinin, Michael G. Plummer, 2003-01-01 The intriguing and provocative results on the effects of the single European market and NAFTA make this short book worth a read even if one is concerned only with how developing countries have been affected by regional trade agreements that do not include them Peter J Montiel Journal of Regional Science This book is an excellent attempt to pin down the effects of regional economic integration on developing countries it will prove to be a good guide for researchers and students of development economics working in the area of regional trading arrangements and policymakers and governments which are in the process of exploring the possibilities of forming free trade areas Pravakar Sahoo Development Policy Review Students interested in either the methodological issues inherent in research on trade or on the economics of trading blocs in general would profit from the book James J Hentz The European Journal of Development Research Questions related to the economics of regionalism became increasingly important beginning in the late 1980s when regional groupings started to become very popular as a tool of commercial policy The goal of this book is to address the question of whether or not regionalism in developed countries has truly benefited developing countries and to what degree regionalism among developing countries and between developed and developing countries will improve economic development prospects Mordechai Kreinin and Michael Plummer consider the implications of the emerging global trend of economic regionalism for developing countries The analysis focuses on the trade and investment effects of integration in developed countries on developing countries as well as the ramifications of regional integration in the latter After an extensive review of the theoretical and empirical literature pertinent to the economics of regionalism the book considers the ex post trade and direct foreign investment effects of the Single Market Program in Europe and NAFTA followed by chapters on ASEAN and economic integration in Latin America primarily MERCOSUR The study suggests three salient conclusions First in designing preferential trading arrangements developed countries should recognize and attempt to minimize the possible discriminating effect on developing countries Second the developing countries have an abiding interest in the success of WTO negotiations that would minimize the discrimination against them of regional groupings in Europe and North America And third any customs unions or free trade areas among the developing countries themselves should be outward looking if they are to enhance the welfare of developing countries Economists and

policy scholars as well as readers interested in regionalism and economic development will find this book a great resource

Regionalism and Its Place in the Multilateral Trading System Organisation for Economic Co-operation and Development, 1996 **Regional Integration Among Developing Countries, Revisited** András Inotai, 1991 The formation of new powerful economic and trading blocs and the transition to market economies in Central and perhaps Eastern Europe has fostered a trend toward new regionalism in the world economy which the virtual failure of the GATT negotiations may speed up To minimize economic losses and avoid marginalization regional groups of developing countries must increasingly work out common positions and join one of the influential groups **Regionalism and Multilateralism After the**

Uruguay Round Paul Demaret, Jean-François Bellis, Gonzalo García Jiménez, 1997 Analyses the relationship between regional trade agreements and multilateral trade regulation in the wake of the Uruguay Round held in Liege October 1996 The first part of the book is devoted to a comparative analysis of the major trade agreements in Europe the Americas and the Asia Pacific Area Covers also an emerging new form of inter regionalism The second part presents a comparative analysis of the treatment of selected issues under the major regional trade agreements in the world and their relation with existing or emerging multilateral rules Finally discusses the extent to which multilateral rules acted as a constraint on regional trade arrangements under the GATT or the new WTO **Regionalism and the Commonwealth Caribbean** Roy Preiswerk, 1969
