Regionalization For Development And Accession To The European Union:

Regionalization for Development and Accession to the European Union Gérard Marcou, 2002 Enlargement of the European Union Allan F. Tatham, 2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union's expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author's conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States Journal of European Integration, 2007 The European Union and Europe's New Regionalism Boyka M. Stefanova, 2017-10-24 This book presents a new approach to studying the European Union's regional and global relevance It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project its enlargement neighborhood and mega regional policies The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward looking process of region building to an open selective system of global interactions **Untangling the Maze of European Union Funds to Bulgaria** Gallina Andronova Vincelette, Iglia Vassileva, 2006 The paper presents a fiscal estimate of Bulgaria's perspective European Union EU membership The projected EU funds have two distinct effects first there is the overall effect on the balance of payments of the country and second there is the pure effect on the national budget The paper concludes that Bulgaria is likely to benefit from large net inflows of resources of an average of 3.7 percent of gross domestic product GDP in 2007-09 In contrast its fiscal position is expected to deteriorate by 1.6 percent of GDP on average in 2007-09 if no expenditure restructuring of

the fiscal framework is carried out The expected deterioration of the public finances related to EU accession would be due to co financing requirements national contributions to the EU budget and possible full pre financing of the EU direct payments to Bulgarian farmers in the first year of accession However the above expenditures will be partly offset by the budgetary compensation allocated out of the EU budget savings from agricultural subsidies and shifting of certain public expenditures to Cohesion Fund supported projects World Bank web site De-coding New Regionalism Professor James W.

Scott,2012-11-28 Bringing together comparative case studies from Central Europe and South America this book focuses on new regions regions created as political projects of modernization and re scaling Through this approach it de codes New Regionalism in terms of its contributions to institutional change while acknowledging its contested nature and contradictions It questions whether these regions are merely a strategy of neo liberal adjustment to changing political and economic conditions or whether they are indicative of true reform greater citizen participation and empowerment It assesses whether these regions are really representing something new or whether they are a reconfiguration of traditional power relationships It provides a timely critical analysis of region building and the extent to which national processes of decentralization and sub national processes of regionalism can enhance the effectiveness and responsiveness of governance *Osteuropa Wirtschaft*

,2003 **Comparativ** ,2004 The Regional Challenge in Central and Eastern Europe Michael Keating,James

Hughes,2003 Central and eastern European countries are undergoing internal transformations to liberal democracy and the market economy At the same time they must meet the criteria for European integration This book examines the territorial dimension of these challenges Central and eastern Europe has its own distinct histories of territorial politics and state structures which continue to influence the present Like their western neighbours the countries of the region must confront a world in which politics and policy making are changing in scale with the emergence of new local and intermediate levels The market economy and free trade can lead to increasing economic disparities National and ethnic minorities create a demand for local and regional devolution The European Commission and other external agents have posed requirements for new administrative structures to manage European funding All this creates a complex set of pressures to which the transition countries must respond This book by an international group of scholars examines these challenges from a diversity of angles historical economic political and institutional Policy Research Working Papers ,2005 **Focus on European Economic**

Integration ,2007 **Comparative Environmental Regionalism** Lorraine Elliott,Shaun Breslin,2011-04-05 Comparative Environmental Regionalism focuses on environmental governance as a key issue of analysis to provide an important new conceptualisation of region and regional power Examining both interregionalism and regional integration the book goes beyond the traditional study of micro regions within the EU to examine regions and regional institutions across Asia Africa and the Americas The focus on forms of governance allows a consideration of the variety of processes and mechanisms developed to deal with collective issues in addition to formal institutional cooperation Using globally based case studies
