The main theme of this study is chosen in response to the general consensus on the importance of conducting a comprehensive study that may shape the economic policies and promote the business sector as well as the government and other organizations However the key question posed by this study is whether the theory that political stability fosters economic development is simply the wishful thinking of people who value both stability and growth or whether it is a delusion of those

who believe that most developing countries may enjoy rapid growth if they are stable The importance of this study is clear South Sudan is confronted with enormous challenges of administrative ethnic political and economic development In light of this the current study addresses the following issues What is the impact of the political system in South Sudan on economic development What is the impact of oil resources on sustainable development What is the impact of the oil shutdown on political and economic stability and what is the possibility of deficit financing Is there any possibility for cooperation between Sudan and South Sudan In this context the major objective of this study is to analyze the political development of the country to verify that political stability fosters the achievement of economic and social development It also seeks to analyse the political history of Sudan in general and South Sudan in particular emphasising the importance of political stability among other considerations as a precondition for socioeconomic development Furthermore other objectives of the study include suggestions on how political stability could be ensured in South Sudan and how good governance may promote political and economic stability In light of the above this study focuses on the issues of the political transition and policies that will improve the economic political and social well being of the people of South Sudan It seeks ways of setting up policies that will raise the standard of living of people with sustained growth and move from a simple low income economy to a modern high income economy It also attempts to develop a framework for cooperation between Sudan and South Sudan The methodology that is adopted to address these issues is collecting sorting and analysing primary and secondary information relating to the history of political and economic development in South Sudan using empirical approaches such as SWOT analysis information sources references and books However this study is organized as follows chapter 1 discusses political stability and economic development in a theoretical framework through which we explore the empirical analysis it is divided into four sections Section 1 focuses on definition causes and measurement of political stability with an aim to assess the effect of political stability on growth related variables In section 2 we define the concept of political instability and measure it by using indicators like the number of coups d tat the number of major government crises the number of cabinet changes and the number of political revolutions as well as political assassinations Section 3 discusses the concept and definition of economic development and summarizes the major theories of economic development in five fundamental elements The last section explores the implications of financing economic development by discussing domestic resources including deficit financing and foreign financial resources and the role of each of them in achieving economic development Chapter 2 presents the political and social background of South Sudan is divided into three sections Section 1 discusses South Sudan s ability to function and successfully implement its policies and strategic vision for the year 2040 Section 2 focuses on the demographic structure of South Sudan in terms of population education languages and culture Section 3 discusses the social indicators such as infrastructure poverty and corruption which affect improving social welfare as well as the political stability and economic development of the Republic of South Sudan Chapter 3 focuses on the South Sudan economy and the challenges

Here we discuss the political and development challenges facing South Sudan as well as the investment opportunities. This chapter discusses the major challenges which face South Sudan especially issues such as border demarcation, political reform and oil shutdown as well as investment opportunities in oil and agriculture. In chapter 4 we discuss South Sudan's oil and economic development. It focuses on oil resources and their impact on sustainable development, the impact of oil shutdown on political and economic development and the possibility of deficit financing. In chapter 5 we discuss the future of stability and prosperity in South Sudan. It discusses how good governance and cooperation can be enormously beneficial to South Sudan in the process of building sustainable political and economic stability and what South Sudan can learn from other countries. The major findings of this study are as follows: Political stability plays an important role in determining economic growth and economic development in many economies. The degree of political stability is high if there is a high degree of democracy or autocracy. Strong democracies or strong autocracies are best equipped to provide political stability that may lead to economic development. It is then the level of political stability within a given country regardless of regime type that results in economic growth. Long term sustainable economic growth depends on the ability to raise the rates of accumulation of physical and human capital by securing necessary sources: domestic, foreign or deficit finance to use efficiently for financing economic development. Most economists view corruption as a major obstacle to development. It is seen as one of the causes of low income and is believed to play a critical role in generating poverty traps. e.g. Blackburn et al 2006. Thus corruption according to this view sands the wheels of development and it makes economic and political transitions difficult. Not only is good governance critical to development but it is also the most important factor in determining whether a country has the capacity to use resources effectively to promote economic growth and reduce poverty. Regional Community Building in East Asia Lee Lai To, Zarina Othman, 2016-09-01. This volume is a collection of papers written by nationals or former nationals of the respective country in ASEAN and Northeast Asia. Unlike other works written by scholars outside ASEAN or East Asia it offers an insider's point of view of the 10 ASEAN states, China, Japan and South Korea on regional community building. While a nationalist perspective may permeate throughout the study it is also clear that pursuing regional cooperation is considered to be important by the respective author denoting the non exclusivity between nationalism and regionalism and the mutual reinforcement of the two. Each author of this volume has made a deliberate effort to introduce and survey the developmental challenges and experiences of his or her country from a historical perspective. All authors without exception have emphasized the importance and advantages in staying with ASEAN or linking up with ASEAN by China, Japan and South Korea in political, security, economic and socio cultural terms. Their papers also reveal that the self help and self strengthening mechanism emphasized by the ASEAN Plus Three process will take time to bear fruits. In the meantime it seems that bilateral interactions and cooperation between ASEAN and Northeast Asian states remain to be more dominant as shown in this study. One can argue that bilateral interactions are the building block of multilateralism interactions. To be sure there is a

deliberate effort in this study to highlight unity in diversity in East Asia in general and ASEAN in particular ASEAN Law and Regional Integration Diane Desierto, David Cohen, 2020-12-29 Since the passage of the ASEAN Charter in 2008 ASEAN has transformed itself from a loose economic cooperation into a formal intergovernmental organization designed to create an ASEAN Community forged together in three pillar communities the ASEAN Political Security Community ASEAN Economic Community and tASEAN Socio Cultural Community Forty years of pre Charter ASEAN practices coupled with over ten years of post Charter ASEAN practices thus far has witnessed the conclusion of hundreds of legally binding regional treaties and similarly binding international instruments in all areas of economic political security and socio cultural concerns for Southeast Asia to achieve ASEAN's rule of law based development objective Pre Charter and post Charter ASEAN Law is variably implemented under a hybrid governance system that depends heavily on ASEAN Member State national implementation alongside ASEAN's evolving regional institutions The result is not a model of deep integration as in the case of the European Union but a particular paradigm of horizontal embeddedness of ASEAN Law in all its norms and operational practices contingent on the capacities and compliance of national government bureaucracies in Southeast Asia This edited collection is a concise authoritative volume covering the practical doctrinal legal and policy aspects of the new regime of ASEAN Law and its consequences for realizing rule of law based development in Southeast Asia's emerging single market and production base Drawing together contributions from a range of key thinkers in the field the editors present the legal and policy making issues implicated in the practical implementation of Southeast Asia's single market and its regime for the free movement of goods services foreign investment and cross border labor The book also examines the nature of regional law making under ASEAN before and after the commencement of regional integration in 2015 the nature of ASEAN's economic regulators as well as the evolving structure for enforcement and harmonization of ASEAN Law through the array of Southeast Asian national courts arbitral tribunals and incipient mechanisms for inter State intra regional and individual State conflict management and dispute resolution This book is highly relevant to students scholars and policy makers with an interest in ASEAN Law and regional policy and to Southeast Asian studies in general Political Economy of East Asian Economic Integration Fusanori Iwasaki, Keita Oikawa, Shujiro Urata, 2025-02-25 This book studies the influence of the Regional Comprehensive Economic Partnership RCEP on the East Asia region and the rest of the world from an international relations perspective Analysing the history and negotiation process of RCEP through a collection of written interviews from negotiators involved in the RCEP this book helps readers understand the origins proceedings and characteristics of mega regional trade integration Individual case studies analyse the RCEP negotiations from the viewpoint of various states or economic blocs such as ASEAN Australia China Japan the European Union EU and the United States Several chapters also illustrate the dynamism of the regional architecture in East Asia concerning other regional movements including the Trans Pacific Partnership TPP Comprehensive and Progressive TPP CPTPP Belt and Road Initiative and the newly launched Indo

Pacific Economic Framework IPEF In sum the chapters illustrate how RCEP member countries and non member countries try to utilise maximise their national interests This book will interest researchers of international relations international politics international economics and international political economy as well as policymakers and negotiators responsible for future regional economic integration projects Political Science ,2011 **The International Politics of Regions** Louis J.
