Cross-Linguistic Variation in System and Text Elke Teich, 2012-02-13 The intuition that translations are somehow different from texts that are not translations has been around for many years but most of the common linguistic frameworks are not comprehensive enough to account for the wealth and complexity of linguistic phenomena that make a translation a special kind of text The present book provides a novel methodology for investigating the specific linguistic properties of translations As this methodology is both corpus based and driven by a functional theory of language it is powerful enough to account for the multi dimensional nature of cross linguistic variation in translations and cross linguistically comparable texts
