Regulating Europe:

Regulating Europe Giandomenico Majone, 2002-11-01 *Regulating Europe* explains why economic and social regulation is rapidly becoming the new frontier of public policy and public administration in Europe both at the national and EU levels. Statutory regulation implemented by independent regulatory bodies is replacing not only older forms of state intervention but also to some extent the redistributive policies of the welfare state. Thus *Regulating Europe* is an examination of the emergence of the regulatory state as the successor of the Keynesian welfare state of the past. Contributions emphasize the parallelism of policy developments at the national and European levels. Part one provides the necessary theoretical background including a new model of demand and supply of Community regulation. The second part presents a series of case studies of particular regulatory policies and institutions in the UK, Germany, France, Spain and the EU. Part three evaluates current policy and institutional developments pointing out how the lack of a tradition of statutory regulation in Europe affects the design of the new institutions. Special attention is devoted to the issue of the democratic accountability of expert politically independent agencies, a problem which contrary to widespread opinion is as severe at the national level as it is in Brussels. It is suggested that the requirements of democratic accountability and of subsidiarity cannot be met by re-nationalizing European policies much less by increasing the current level of centralization. A more promising solution is the development of regulatory networks closely integrating national and supranational regulators.

Regulating Utilities Martin Cave, 1998. Utility regulation in Britain has now entered a phase in which debate is no longer so much concerned with whether it is preferable to rival systems but with how to shape the regulatory contract in monopoly areas and in potentially competitive areas how to ensure rivalry.

Convention on Europe Jo Shaw, Paul Magnette, Lars Hoffman, Anna Vergés Bausili, 2008-06-10. This new study explores issues of legitimacy and subsidiarity in the debate about the future of Europe. It looks at the assumptions behind the Constitutional Convention and its working methods as well as its implications for reform processes in the European Union. It also analyzes the concept of subsidiarity both from the perspective of the division of powers and as a factor legitimizing the political structures of Europe. The book also provides an analytical analysis of how the Constitutional Convention ties in the broader constitutionalization process of the European Union.

The European Commission David Spence, Geoffrey Edwards, 2006. This is the first update since 1997 of a complete guide to the way the Commission works and its relationship to the other European institutions. The edition has been completely revised and rewritten with contributions from a diverse range of leading academics and practitioners.
