Periodizing Capitalism and Capitalist Extinction Richard Westra, 2019-05-15 This book offers the first systematic exposition and critique of the major approaches to periodizing capitalism bringing to bear both deep rooted theoretical questions and meticulous empirical analysis to grapple with the seismic economic changes capitalism has experienced over the past 150 years Westra asks why despite the anarchic and crises tendencies captured in radical analyses capitalism manages to reload in a structured stage that realizes a period of relatively stable accumulation He further evaluates arguments over the economic forces bringing stages of capitalist development to a crashing end Particular attention in the periodization literature is devoted to examining the economy of the post World War II golden age and what followed its unceremonious demise The final chapters assess whether what is variously dubbed neoliberalism globalization or financialization can be understood as a stage of capitalism or rather an era of capitalist disintegration and extinction

Regulation Theory and Australian Capitalism Brett Heino, 2017-11-22 The end of the post World War II long boom in the mid 1970s proved the beginning of a process of political economic change that has fundamentally transformed labour law both in Australia and across the developed world more generally This is a phenomenon with deep ramifications for social justice The dissolution of productive industry the fragmentation of employment categories the rise of profound employment precarity and an increasingly hostile legal environment for trade unionism have been of immense significance for key social justice issues including income inequality the rise of a new working underclass and the marginalization of organised labour By combining the concepts of the Parisian Regulation Approach with an explicitly Marxist jurisprudence this study offers a theoretically rigorous yet empirically sensitive account of legal transition with key case studies in the metal food processing and retail sectors Given the similar development logic of post World War II capitalism in Western societies this theory although operationalised in the Australian context can be used in the effort to explain labour law change more broadly

The Future of Capitalism After the Financial Crisis Richard Westra, Dennis Badeen, Robert Albritton, 2014-12-17 The Future of Capitalism After the Financial Crisis The Varieties of Capitalism Debate in the Age of Austerity contains thirteen world leading political economists writing from within eight different countries who critically analyze the current crisis tendencies of capitalism both globally and in particular countries Given the likelihood of an increasingly crisis prone future for capitalism it is important not only to rethink capitalism in its current manifestations or varieties It is also important to rethink research methods and conceptual frameworks in preparation for understanding an increasingly rocky future in which capitalism itself could go the way of the many species that in the past were endangered only to become extinct More and more titles of books and articles are suggesting that capitalism or perhaps civilization itself is endangered if we do not make radical changes in the near future This book breaks with academic path dependency and attempts to open new vistas of political economy and of multidisciplinary analysis that are crucially important if our thought processes are to be effective in a world in jeopardy The varieties of capitalism VoC debate itself came into being as the Soviet Union unraveled It drew in scholarship from a cross section of Marxian and heterodox political economy The key argument of VoC was that if capitalism was the only global option then those on the Left must get involved in policy discussions on how capitalist economies can be fashioned to become competitive as well as progressive However the financial crisis has seen policy across the advanced economies veer toward competitiveness coupled with austerity The lesson for the Left is that alternatives to capitalism must be sought in the here and now

Classical Marxism in an Age of Capitalist Crisis William Briggs, 2019-03-14 Will capitalism survive forever Capitalism has always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance It explores the contradictions within capitalism as well as explains why Marxism

has been unable to mount a sustained challenge to capitalism In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology

Regulation Theory Robert Boyer, Yves Saillard, 2005-08-03 Robert Boyer and Yves Saillard's *Theorie de la Regulation* introduces the Francophone public to one of the most important new currents in social science of the past half century This long awaited translation will help broaden its impact still further *Regulation Theory* focuses on the structural features of a given model and has helped enliven the examination of core economic concepts

Beyond the Regulation Approach Bob Jessop, Ngai-Ling Sum, 2006 Every now and then a book comes along that you positively want to be asked to read and review and this is one of them a major work of scholarship in its own right while at the same time a ground clearing exercise for what is to follow This it should be emphasized is a hugely impressive body of work an expansive statement of Jessop's contribution as a major figure within the world of regulation approaches Ray Hudson *Economic Geography* This book presents a detailed and critical account of the regulation approach in institutional and evolutionary economics Offering both a theoretical commentary and a range of empirical examples it identifies the successes and failures of the regulation approach as an explanatory theory and proposes new guidelines for its further development Although closely identified with heterodox French economists there are several schools of regulation theory and the approach has also been linked to many topics across the social sciences Bob Jessop and Ngai Ling Sum provide detailed criticisms of the various schools of the regulation approach and their empirical application and have developed new ways of integrating it into a more general critical exploration of contemporary capitalism The authors go on to describe how the regulation approach can be further developed as a progressive research paradigm in political economy Also presented is a detailed philosophical as well as theoretical critique of the regulation approach and its implications for the philosophy of social sciences and questions of historical analysis especially periodization Addressing the implications of the regulation approach for both the capitalist economy and the changing role of the state and governance this book will be of great interest to a wide ranging audience including institutional and evolutionary economists economic and political sociologists and social and political theorists
