**Regulating Contracts** Hugh Collins, 2002 Using an interdisciplinary approach involving economics sociology and law *Regulating Contracts* explores fundamental questions about the purposes and effects of legal regulation of contractual relationships What kind of social relation do contracts create or more precisely how do contracts govern social interaction How are contractual relations or more generally markets constructed Does the law play a significant role in particular practices and in particular what do lawyers courts and legal sanctions contribute to the contractual social order For what distributive purposes does the law attempt regulation The controversial conclusions of this study suggest that the law plays an insignificant role in the construction of markets and that law and lawyers could provide better assistance by using indeterminate regulation that permits the recontextualization of legal reasoning Legal regulation of contracts concerned with redistributive tasks such as redressing unfairness countering unjust power relations and improving access to justice is evaluated both with respect to the objectives of regulation and the search for the most efficient and efficacious form of regulation The argument in the book is that control of unfairness is both desirable and practicable that power relations should be modified for the sake of efficiency and that better access to justice is unhelpful to the resolution of contractual disputes **Commentaries on European Contract Laws** Nils Jansen, Reinhard Zimmermann, 2018-07-12 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a

bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other. As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law. Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law.
