Regulation of Gluconeogenesis

Hans-Dieter Söling, Berend Willms, 2013-09-24 Regulation of Gluconeogenesis documents the proceedings of 9th Conference of the Gesellschaft für Biologische Chemie This meeting was first planned as a continuation of a former Conference of the Gesellschaft für Biologische Chemie on Stoffwechsel der isoliert perfundierten Leber However the organizers of the present meeting decided that it seemed far more reasonable to restrict the subject to a special biochemical problem than to a technical procedure which had not changed very much during the last years This volume contains 24 chapters and begins with a paper that identifies the substrates activators and inhibitors which may influence the rate of reaction of pyruvate carboxylase from liver Other papers deal with topics such as purification and properties of pyruvate carboxylase from rat liver the location of pyruvate carboxylase in mitochondria effects of quinolinic acid on the free and total nicotinamide adenine dinucleotides of rat liver and effects of biguanides on gluconeogenesis in rats and guinea pigs

Shrimp, 2011-05-25 Aquaculture now supplies half of the seafood and fisheries products consumed worldwide and is gaining international significance as a source of food and income Future demands for seafood and fisheries products can only be met by expanded aquaculture production Such production will likely become more intensive and will depend increasingly on nutritious and efficient aquaculture feeds containing ingredients from sustainable sources To meet this challenge Nutrient Requirements of Fish and Shrimp provides a comprehensive summary of current knowledge about nutrient requirements of fish and shrimp and supporting nutritional science This edition incorporates new material and significant updates to information in the 1993 edition It also examines the practical aspects of feeding of fish and shrimp Nutrient Requirements of Fish and Shrimp will be a key resource for everyone involved in aquaculture and for others responsible for the feeding and care of fish and shrimp It will also aid scientists in developing new and improved approaches to satisfy the demands of the growing aquaculture industry
