Reincarnating Mind Or The Ontopoietic Outburst In Creative Virtualities II:

Ontopoietic Expansion in Human Self-Interpretation-in-Existence Anna-Teresa Tymieniecka, 1998 Papers from the Second World Phenomenology Congress convened September 12-18 1995 in Guadalajara Mexico articulate the four main tenets of the ontopoiesis of life: the priority of the creative act over the cognitive intentional act; the revelation that the human creative condition is pivotal in tracing specifically human powers; that the creative act of the human being is the meeting ground for all human endeavors; and the ontopoietic self-individualization of life. No index. Annotation copyrighted by Book News Inc. Portland, OR. Passions of the Earth in Human Existence, Creativity, and Literature International Society for Phenomenology and Literature. Congress, 2001 Literature reveals that the hidden strings of the human passionate soul are the creative source of the specifically human existence. Continuing the inquiry into the elemental passions of the soul and the human creative soul pursued in several previous volumes of this series, the present volume focuses on the passions of the earth, bringing to light some of the primogenital existential threads of the innermost bonds of the Human Condition and mother earth. In the author's words, the book's purpose is to unravel the essential bond between the living human being and the earth, a bond that lies at the heart of our existence. A heightened awareness of this bond should enlighten our situation and help us find our existential bearings. **Logos of Phenomenology and Phenomenology of The Logos. Book Three** Anna-Teresa Tymieniecka, 2006-07-19 Situated at the crossroads of nature and culture, physics and consciousness, cosmos and life history intimately conjoined with time, continues to puzzle the philosopher as well as the scientist. Does brute nature unfold a history? Does human history have a telos? Does human existence have a purpose? Phenomenology of life projects a new interrogative system for reexamining these questions. We are invited to follow the logos of life as it spins in innumerable ways: the interplay of natural factors, human passions, social forces, science and experience through interruptions and kairic moments of accomplishment in the human creative imagination and intellectual reasoning. There then runs a cohesive thread of reality. Phenomenology World-Wide Anna-Teresa Tymieniecka, 2014-11-14 Phenomenology is the philosophy of our times. Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl. Now its seminal ideas have been handed over to a new era. The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers. It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge, transforming our way of seeing the world, our actions toward others, and our lives. Phenomenology's universal spread has, however, oftentimes diluted its original sense, even beyond recognition, and led to a weakening of its dynamics. There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them. This is the aim of the present book: resourcement and reinvigoration. It is meant to be not only a reference work but also a guide for research and study. To restore the authentic vision of phenomenology, we propose returning to its foundational

source in Husserl's project of a universal science unpacking all its creative capacities. In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality: ideal structures, constitutive consciousness, the intersubjective lifeworld and beyond. The key concepts and phases of Husserl's thought are here exfoliated. Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated. Phenomenology's geographic spread is reviewed. We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life-significant issues phenomenology addresses and to how it has enriched the human sciences. Lastly the phenomenological project's new horizons on the plane of life are limned: horizons with so powerful a draw that they may be said not to beckon but to summon. Here is the movement's vanguard. This collection has 71 entries. Each entry is followed by a relevant bibliography. There is a helpful Glossary of Terms and an Index of Names. in Creative Virtualities Anna-Teresa Tymieniecka, 1997-12-31. Tymieniecka's phenomenology of life reverses current priorities, stressing the primogenital role of aesthetic enjoyment rather than cognition as typifying the Human Condition. The present collection offers clues to a crucial breakthrough in the perennial uncertainties about the powers and prerogatives of the human mind. It proposes human creativity as the pivot of the mind's genesis and its endowment. In the midst of the current defiance of the transcendental certainties of cognition, this turn to the creative act of the human being represents a radical reversion to an approach to human powers that is predominated by the aesthetic virtualities of the Human Condition. The collection lays down the foundations for a new discovery of the human mind, addressing the plumbing of the functional system that originates in the creative potentiality of the Human Condition, undercutting the currently prevalent empirical reductionism. **American Book Publishing Record**, 1997.
