Beiträge zur empirischen Sprachwissenschaft Winfried Boeder, 1998 *Professionalisierungsprozesse angehender Lehrpersonen in den berufspraktischen Studien* Julia Kosinár, Sabine Leineweber, Emanuel Schmid, 2016 Wie werden Studierende zu professionell handelnden Lehrpersonen und welche Bedeutung haben die berufspraktischen Studien für die Anregung und die Begleitung ihres Professionalisierungsprozesses Obwohl den Praxisphasen in der Lehrerinnen und Lehrerbildung von jeher eine große Bedeutung beigemessen wird lagen sie über viele Jahre hinweg eher wenig im Blickfeld bildungswissenschaftlicher Forschung In jüngerer Zeit ist ein auch professionalisierungstheoretisch anregender wissenschaftlicher Diskurs entstanden der sich durch zunehmend variantenreichere methodologische und methodische Zugänge auszeichnet Dies spiegelt sich auch in den Beiträgen dieses Bandes wider Die hier vorgestellten empirischen Studien geben Einblicke in Prozesse professioneller Entwicklung in der ersten und zweiten Ausbildungsphase in die Wirkmächtigkeit individueller Voraussetzungen und kontextueller Bedingungen sowie in die Veränderbarkeit verschiedener Handlungsdimensionen und Aspekte des beruflichen Selbstverständnisses Den Befunden lassen sich wertvolle Hinweise für die konzeptuelle Weiterentwicklung der Lehrerinnen und Lehrerausbildung an Schulen und Hochschulen entnehmen

countries. Highly skilled Latin American migrants and the negotiation of cultural capital Ilana Nussbaum Bitran, 2020-11-10 The migration of highly skilled individuals brings together two important and well developed institutional systems on the one hand the organization of professions and on the other hand the state and its migration and integration regime Therefore professional migrants move between two levels of regulation The first one applies to their specific professional group and regulates the acquisition of knowledge as well as the participation in the labor market The second one controls the access to and settlement in a given country Taking the examples of medicine and the information technologies IT in Germany and Chile the present research asks how different institutional settings shape the cultural capital

negotiation strategies of highly skilled Latin American migrants Using Bourdieu's relational theory and especially his concepts of field and capital this book seeks to understand professions as fields and to follow the trajectories of highly skilled Latin American migrants within two transnational professional fields Using a reconstructive praxeological approach this book presents three typologies showing how the interaction between transnational professional fields and national regulations creates different possibilities for highly skilled migrants to negotiate their capital and the strategies they develop to reach a good position in their host country's labor market Lexikon der Sprachwissenschaft Hadumod Bussmann, 2002
