need to redefine our relationship with commerce to reconcile our relationship with the Earth The authors see the seeds of economic change in new and fundamentally different forms in entrepreneurship networks governance transparency and accountability already being planted and beginning to grow To nurture these developments they believe that we need to learn to see in new ways to begin to recognise their worth and to create a sufficiently broad coherent and integrated social movement for change that can overcome the momentum of the current system Incremental change CSR for example will not be enough Deep change is needed in the purposing goals and practice of business enterprise Deep change is needed in the ways that we as humans relate to nature and natural systems under severe stress from resource overuse and depletion a quadrupled population during the 20th century and human impact on climate And deep change is needed in the ways in which we relate to each other use our time and build our communities This book documents some of the changes that are already in progress and provides optimism that a sustainable enterprise economy geared to innovation creativity problem solving entrepreneurialism and enthusiasm for life can produce wealth preserve the natural environment and nurture social capital
