The Winner's Curse Richard H. Thaler, Alex Imas, 2025-10-21 Nobel Prize winner Richard H Thaler and rising star economist Alex O Imas explore the past present and cutting edge future in behavioral economics in *The Winner's Curse* Why do people cooperate with one another when they have no obvious motivation to do so Why do we hold on to possessions of little value And why is the winner of an auction so often disappointed Over thirty years ago Richard H Thaler introduced readers to behavioral economics in his seminal *Anomalies* column written with collaborators including Daniel Kahneman and Amos Tversky These provocative articles challenged the fundamental idea at the heart of economics that people are selfish rational optimizers and provided the foundation for what became behavioral economics That was then Now three decades later Thaler has teamed up with economist Alex O Imas to write a new book with an original and creative format Each chapter starts with an original Anomaly retaining the spirit of its time stamp Then shifting to the present the authors provide updates to each asking how the original findings have held up and how the field has evolved since then It turns out that the original findings not only hold up well but they show up almost everywhere Anomalies pop up in people's decisions to save for retirement and how they carry outstanding credit card debt Even experts fail to optimize The key concept of loss aversion explains missed putts by PGA pros and the selection of which stocks to sell by portfolio managers In this era of meme stocks and Dogecoin it is hard to defend the view that financial markets are highly efficient The good news however is that the anomalies have gotten funnier With both readability and rigor *The Winner's Curse* is for anyone from those with a cursory understanding of economics to fellow economists Each chapter provides a key insight into human behavior so readers learn how to better understand the choices made by their friends colleagues and customers and they might just become better at making decisions themselves Only recommended for humans
