Plant Conservation and Biodiversity David L. Hawksworth, Alan T. Bull, 2007-09-18 Non timber forest products NTFP hold economic and cultural significance for millions of people across the globe For instance hundreds of millions of rural peoples currently derive a significant portion of both their subsistence needs and cash income from gathered plant and animal products Iqbal 1993 Vedeld et al 2004 Thousands of wild NTFP are also harvested for local use in other cultural and religious activities such as rituals ceremonies and dances e.g. FAO 1991 A growing body of literature has illustrated that NTFP harvest can have ecological consequences at multiple ecological scales and that demographic responses to harvest are heavily influenced by harvesting practices see review by Ticktin 2004 However although many NTFP are harvested from disturbed habitats and subject to multiple pressures Cunningham 2001

few quantitative studies have addressed this issue For example a small number of studies have assessed the demographic effects of NTFP management practices in the context of browsing or grazing Endress et al 2004b Ghimire et al 2005 or human induced re Ticktin 2005 Nonetheless the demographic consequences of NTFP harvest and management in the context of other disturbance factors such as alien invasive species have not been addressed to date
