Pioneering With Taconite:

Pioneering with Taconite Edward W. Davis, 2004-03 With humor and insight E W Davis tells the story that begins with the discovery of then valueless taconite on Minnesota's Mesabi Iron Range in 1870 and several decades of attempts to process taconite commercially Davis details the ups and downs of the exciting decades long research effort that resulted in a workable extraction method followed by frustrating attempts to form the concentrate into small pellets Finally Davis describes building the first successful commercial processing plant at Silver Bay in the 1950s and the contributions by various companies to the birth of the industry Along the way insider Davis recounts the founding of the three new northern Minnesota taconite towns Babbitt Silver Bay and Hoyt Lakes

Mining North America John R. McNeill, George Vrtis, 2017-07-11 Over the past five hundred years North Americans have increasingly turned to mining to produce many of their basic social and cultural objects From cell phones to cars and roadways metal pots to wall tile and even talcum powder mineral intensive products have become central to modern North American life As this process has unfolded mining has also indelibly shaped the natural world and North Americans relationship with it Mountains have been honeycombed rivers poisoned and forests leveled The effects of these environmental transformations have fallen unevenly across North American societies Mining North America examines these developments Drawing on the work of scholars from Mexico the United States and Canada this book explores how mining has shaped North America over the last half millennium It covers an array of minerals and geographies while seeking to draw mining into the core debates that animate North American environmental history generally Taken together the authors contributions make a powerful case for the centrality of mining in forging North American environments and societies

Iron Will Terry S. Reynolds, Virginia P. Dawson, 2011-03-15 The history of Cleveland Cliffs a company that played a key role in iron mining development in the Lake Superior region In Iron Will Cleveland Cliffs and the Mining of Iron Ore 1847 2006 Terry S Reynolds and Virginia P Dawson tell the story of Cleveland Cliffs the only surviving independent American iron mining company now known as Cliffs Natural Resources Headquartered in Cleveland Ohio Cleveland Cliffs played a major role in the opening and development of the Lake Superior mining district and Michigan's Upper Peninsula Through Cleveland Cliffs history Reynolds and Dawson examine major transitions in the history of the American iron and steel industry from the perspective of an important raw materials supplier Reynolds and Dawson trace Cleveland Cliffs beginnings

around 1850 its growth under Samuel L Mather and his son William G Mather its emergence as an important player in the growing national iron ore market and its tribulations during the Great Depression The authors explore the company's fortunes after World War II when Cleveland Cliffs developed technologies to tap into vast reserves of low grade Michigan iron ore and turned to joint ventures and strategic partnerships to raise the capital needed to implement them The authors also explain how the company became the largest independent producer of iron ore in the United States by purchasing the mining interests of its bankrupt partners during the implosion of the American steel industry in the late twentieth and early twenty first centuries Reynolds and Dawson detail Cleveland Cliffs evolving efforts to deal with labor from its early mostly immigrant workforce to its ambitious program of welfare capitalism in the early twentieth century to its struggles with organized labor after World War II Iron Will is a thorough well organized history based on extensive archival research and interviews with company personnel This story will appeal to scholars interested in industrial or mining history business historians and those interested in Great Lakes and Michigan history *Unlikely Environmentalists* Paul Charles Milazzo, 2006 Reveals how boosters bureaucrats and engineers not grassroots protesters were truly the ones responsible for spearheading the passage of the Clean Water Act of 1972 How these unlikely protagonists helped to pass the era's most far reaching regulatory law gives us rare insight into how Congress was able to take the lead in addressing those concerns namely in the form of water quality issues **The Reserve Mining Controversy** Robert V.
