religious pluralism that was wholly dependent on a separation of economics from religion As the narrative unfolds Denison shows how Utes and their Anglo American allies worked together to systematize a religion out of existing ceremonial practices anthropological observations and Euro American ideals of nature A variety of societies then used religious beliefs and practices to give meaning to the land which in turn shaped inhabitants perception of an exclusive American religion Ultimately this movement from the tangible to the abstract demonstrates the development of a normative American religion one that excludes minorities even as they are the source of the idealized expression *American Economist* ,1899
