Teaching the Transatlantic Eighteenth Century Jennifer Frangos,Cristobal Silva,2020-05-15 The central axiom of Teaching the Transatlantic Eighteenth Century is that the classroom functions as a site for research and collaboration not only as a space that reflects the research of individual teacher scholars but as a generative site to put ideas theories and methodologies into play Whereas transatlanticism has transformed research practices over the last decade the present collection is concerned with exploring what this transformation looks like in the classroom and how the classroom continues to shape research practices in the field Contributors address issues such as how the traffic in ideas people and commodities between Europe Africa and the New World are considered in classroom settings how inter and intra departmental collaborations reshape our approaches to teaching the eighteenth century how and why Transatlantic Studies can function as an introduction to college study and how it can help more advanced students to revise their notions of nation place and identity By now there are a number of anthologies available to help instructors determine what transatlantic material to teach but none that engage why and how to teach it or what teaching it can do for us our students and our profession Rather than simply providing reading lists or a collection of anecdotes about lesson plans Teaching the Transatlantic Eighteenth Century emphasizes theorizing critical engagements with interdisciplinary focus on and the transformative potential of Transatlantic Studies The primary market for Teaching the Transatlantic Eighteenth Century is university college and community college professors researchers and students with three specific subgroups 1 Teachers new to Transatlantic Studies Teachers coming to Transatlantic Studies for the first time will find both suggestions for materials or topical units to be integrated into existing courses e g a unit on transatlantic exchange that could figure in an eighteenth century literature survey course and ideas for developing new courses altogether 2 Teachers already teaching and or researching in the field of Transatlantic Studies Such scholars will find material to broaden their approach to familiar courses and subjects inter or cross disciplinary focus new texts successful clusterings of texts or themes or approaches and ideas for team teaching or linking courses with other faculty 3 Teachers involved in Transatlantic Studies programs especially those that focus on contemporary Post WWII context e g at the University of Dundee the University of North Carolina Chapel Hill and the University of Birmingham Teaching the Transatlantic Eighteenth Century will provide historical context for current geopolitical studies perspective on the dynamics and historical and political forces occurring in the eighteenth century and contributing to 19th 20th and 21st century politics nations and paradigms *A Historical Atlas of the United States and Its Territories* Amy Romano,2004-12-15 Looks at the politics and policies that allowed for the expansive growth of America after World War II discussing how the United States claimed authority over territories independent commonwealths and sparsely populated islands around the world **Investigation of the Evolving Relationship of Pirate, Buccaneer and Privateer**

The Ethics of Military Privatization David M. Barnes, 2016-08-25 This book explores the ethical implications of using armed contractors taking a consequentialist approach to this multidisciplinary debate While privatization is not a new concept for the US military the public debate on military privatization is limited to legal financial and pragmatic concerns A critical assessment of the ethical dimensions of military privatization in general is missing More specifically in light of the increased reliance upon armed contractors it must be asked whether it is morally permissible for governments to employ them at all To this end this book explores four areas that highlight the ethical implications of using armed contractors how armed contractors are distinct from soldiers and mercenaries the commodification of force the belligerent equality of combatants and the impact of armed contractors on the professional military While some take an absolutist position wanting to bar the use of private military altogether this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option Recognising that outsourcing force will continue this book thus proposes some changes to account for the problems of commodification belligerent equality and the challenge to the military profession This book will be of interest to students of private security military studies ethics security studies and IR in general
