Psychokinesis Stanley Krippner,1977-11 The history of humankind cannot be charted as a steady linear upward slope but rather as a series of quantum jumps of short duration separated by plateaus of varying duration during which no progress occurred During these periods of no progress the revolutionaries who produced the preceding quantum jump pass from the scene their principles and concepts become concretized as dogma and a new establishment is born whose sacred duty is the protection of the dogma against the new revolutionaries The last quantum jump was the scientific revolution of the nineteenth century which laid the groundwork for our present technological civilization and perhaps more important also shaped our philosophical view of what is a human being Since the basis of this scientific revolution was reason logic measurement and total reliance upon the organized senses the resultant view of the person is that of an automaton functioning in a clockwork world The power of this view is evident in the advances made in medical science up until the 1950s The twin triumphs of sanitation and preventive medicine and the development of the antibiotic concept completely revolutionized the practice of medicine and by 1950 those of us in the profession were anticipating a new golden age of medicine But in fact the reality has been disaster The mechanistic view of humanity has led to more and more technological applications of ever increasing complexity and cost and ever decreasing efficiency *Ghosted!* Brian Laythe,,James Houran,Neil Dagnall,2022-07-19 Reports of paranormal experiences vary tremendously but are often associated with ghosts haunted houses and otherwise eerie circumstances There exist both classic and modern texts on ghosts and haunted or possessed people places and spaces many discuss traditional ideas regarding such phenomena or utilize now outdated

research in highly academic and technical ways This book offers a very different approach in reviews provided by a leading edge research program devoted to who has ghostly experiences and why With new insights both global in scale and multidisciplinary in scope this collaboration by five researchers uncovers consistent evidence that anomalous experiences represent a very real Haunted People Syndrome a term describing anomalous experiences that manifest recurrently to the same percipients and are interpreted as ghostly with implications for future research across academia The participation of new citizen scientists the field investigators and researchers among us is invited in furthering the exploration of paranormal mysteries Photos and figures illustrating concepts and models are included as is a glossary
