*The Routledge Companion to the French Revolution in World History* Alan Forrest, Matthias Middell, 2015-09-16 The Routledge Companion to the French Revolution in World History engages with some of the most recent trends in French revolutionary scholarship by considering the Revolution in its global context Across seventeen chapters an international team of contributors examine the impact of the Revolution not only on its European neighbours but on Latin America North America and Africa assess how far events there impacted on the Revolution in France and suggest something of the Revolution's enduring legacy in the modern world The Companion views the French Revolution through a deliberately wide lens The first section deals with its global repercussions from the Mediterranean to the Caribbean and includes a discussion of major insurrections such as those in Haiti and Venezuela Three chapters then dissect the often complex and entangled relations with other revolutionary movements in seventeenth century Britain the American colonies and Meiji Japan The focus then switches to international involvement in the events of 1789 and the circulation of ideas people goods and capital In a final section contributors throw light on how the Revolution was and is still remembered across the globe with chapters on Russia China and Australasia An introduction by the editors places the Revolution in its political historical and historiographical context The Routledge Companion to the French Revolution in World History is a timely and important contribution to scholarship of the French Revolution

**A History of the French Revolution** Henry Morse Stephens, 1886

*The French Revolution as a Moment of Respatialization* Matthias Middell, Megan Maruschke, 2019-09-23 The French Revolution has primarily been understood as a national event that also had a lasting impact in Europe and in the Atlantic world Recently historiography has increasingly emphasized how France's overseas colonies also influenced the contours of the French Revolution This volume examines the effects of both dimensions on the reorganization of spatial formats and spatial orders in France and in other societies It departs from the assumption that revolutions shatter not only the political and economic old regime order at home but in an increasingly interdependent world also result in processes of respatialization The French Revolution therefore is analysed as a key event in a global history that seeks to account for the shifting spatial organization of societies on a transregional scale

**The French Revolution** Thomas Carlyle, 1894

**Historicizing the French Revolution** Antonino De Francesco, 2022-03-24 This book provides a critical examination of over 300 historical works about the French Revolution published in Europe in particular in France Great Britain Germany Italy and Russia as well as in the United States between 1789 and 1989 It also goes on to examine recent trends in French Revolution historiography and consider where histories of this landmark event may go in the future By emphasizing the elements which have been valued or hidden exalted or silenced Historicizing the French Revolution shows how reflections on 1789 are always fundamentally tied to the times in which they are formulated Antonino De Francesco looks at the ways in which these historical accounts can be seen to support and at times contrast with the formation of political modernity both in

national and international contexts as it has taken shape in the hundreds of years that have followed this key moment in world history *History of the French Revolution from 1789 to 1814* Mignet (M., François-Auguste-Marie-Alexis), 1856

**The Rhetoric of Historical Representation** Ann Rigney, 2003-02-13 The role which narrative discourse plays in the writing of history is an area of increasing interest to historians and literary theorists resulting in some of the most stimulating and controversial historiographical work in recent years The rhetoric of historical representation represents one of the first attempts to carry out a sustained textual analysis of historiographical practice Ann Rigney focusses on three celebrated nineteenth century histories of the French Revolution written by Alphonse de Lamartine Jules Michelet and Louis Blanc What distinguishes her account is the sensitivity and sophistication with which she handles the semiotic issues each text raises She shows how a greater understanding of the specific features of historical narration can be achieved through a comparative analysis of the different representations of a common event This fresh new perspective on a long standing historiographical debate brings into relief the ways in which the narrative medium can be used to invest events with one significance rather than another
