

A sepia-toned photograph of a person in a field with mountains in the background. The person is in the lower-left foreground, seen from behind, looking out over a vast, hilly landscape. The terrain is covered in dense, low-lying vegetation. In the distance, a range of mountains is visible under a hazy sky. The overall tone is historical and contemplative.

Place and People William C. Clarke, 2023-11-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1971 **A Place Against Time** Paul Sillitoe, 2013-10-31 A Place Against Time is an ethnographically focused environmental study of Montane New Guinea where people were among the world's first to cultivate crops some ten millennia ago and where today an enduring agricultural condition continues It arranges its account of climate vegetation topography and geology according to their relationship with the soils of the region occupied by Wola speakers in the Southern Highlands Province of Papua New Guinea in the Western Pacific This book breaks new intellectual ground as an ethno environmental investigation with a soils perspective ethno pedology being a little researched topic to date Architecture and Order Michael Parker Pearson, Colin Richards, 2003-09-02 Architecture is a powerful medium for representing ordering and classifying the world and understanding the use of space is fundamental to archaeological inquiry Architecture and Order draws on the work of archaeologists social theorists and architects to explore the way in which people relate to the architecture which surrounds them In many societies houses and tombs have encoded cultural meanings and values which are invoked and recalled through the practices of daily life Chapters include explorations of the early farming eye of Europe from before the use of metals to the Classical and Medieval worlds of the Mediterranean and Europe Research of the recent past and present include an overview of hunter gatherers camp organization a reassessment of the use of space amongst the Dogon of West Africa and an examination of mental disorders relating to the use of space in Britain The volume goes beyond the implication that culture determines form to develop an approach that integrates meaning and practice Ancestral Rainforests And The Mountain Of Gold David Hyndman, 2021-10-28 The ancestral rain forests for the Wopkaimin people have long been a sacred geography a place that has allowed them to act out the obligations of the male cult system and social relations of production based on kinship Today the people and their place are suffering disastrous consequences from the sudden imposition of one of the world's largest mining projects which has brought about severe social and ecological disruptions Based on fieldwork spanning more than a decade David Hyndman's book traces the extraordinary socioecological transformation of a traditional society confronting modern technological risk Across the island of New Guinea the clash between the simple reproduction and subsistence production system of indigenous peoples and the expanded production and private accumulation system of mining has resulted in environmental degradation **Alchemy in the Rain Forest** Jerry K. Jacka, 2015-10-23 In Alchemy in the Rain Forest Jerry K Jacka explores how the indigenous population of Papua New Guinea's highlands struggle to create meaningful lives in the midst of extreme social conflict and environmental degradation Drawing on theories of political

ecology place and ontology and using ethnographic environmental and historical data Jacka presents a multilayered examination of the impacts large scale commercial gold mining in the region has had on ecology and social relations Despite the deadly interclan violence and widespread pollution brought on by mining the uneven distribution of its financial benefits has led many Porgerans to call for further development This desire for increased mining Jacka points out counters popular portrayals of indigenous people as innate conservationists who defend the environment from international neoliberal development Jacka s examination of the ways Porgerans search for common ground between capitalist and indigenous ways of knowing and being points to the complexity and interconnectedness of land indigenous knowledge and the global economy in Porgera and beyond
