Place Not Forgotten:

Metaphor, Analogy, and the Place of Places Carl G. Vaught, 2004 Vaught identifies the place where religion and philosophy meet and he does so in constant conversation with Augustine Hegel Heidegger and Jaspers Vaught argues that both religious and philosophical discourse assume one of four modes figurative analytical systematic and analogical Any real innovation occurs by moving from one mode of discourse to another Vaught also explores the relationship among space time and place as well as mystery power and structure Remarkably Vaught shows how the category of place serves as the intersection of both triads In the end place is the orientation that guides the discussions of Being and God where philosophy and religion are joined The Church ,1860 **The Lord is Right** Paul Waldenström, 1889 **Augustine's Invention of the Inner Self : The Legacy of a Christian Platonist** St. David's Phillip Cary Director of the Philosophy Program Eastern College, Pennsylvania, 2000-06-12 In this book Phillip Cary argues that Augustine invented the concept of the self as a private inner space a space into which one can enter and in which one can find God Although it has often been suggested that Augustine in some way inaugurated the Western tradition of inwardness this is the first study to pinpoint what was new about Augustine's philosophy of inwardness and situate it within a narrative of his intellectual development and his relationship to the Platonist tradition Augustine invents the inner self Cary argues in order to solve a particular conceptual problem Augustine is attracted to the Neoplatonist inward turn which located God within the soul yet remains loyal to the orthodox Catholic teaching that the soul is not divine He combines the two emphases by urging us to turn in then up to enter the inner world of the self before gazing at the divine Light above the human mind Cary situates Augustine's idea of the self historically in both the Platonist and the Christian traditions The concept of private inner self he shows is a development within the history of the Platonist concept of intelligibility or intellectual vision which establishes a kind of kinship between the human intellect and the divine things it sees Though not the only Platonist in the Christian tradition Augustine stands out for his devotion to this concept of intelligibility and his willingness to apply it even to God This leads him to downplay the doctrine that God is incomprehensible as he is convinced that it is natural for the mind's eye when cleansed of sin to see and understand God In describing Augustine's invention of the inner self Cary's fascinating book sheds new light on Augustine's life and thought and shows how Augustine's position developed into the more orthodox Augustine we know from his later writings **Augustine's Invention of the Inner Self** Phillip Cary, 2000 Phillip Cary argues that Augustine invented the concept of the self as a private inner space a space into which one can enter and in which one can find God This study pinpoints what was new about his philosophy of inwardness and situates it within a narrative of his intellectual development and relationship to the Platonist tradition **Parliamentary Debates** ,1876 **Aunt Kitty's Tales** Maria Jane McIntosh, 1847 The American Indian (Uh-nish-in-na-ba) Elijah Middlebrook Haines, 1888 The Bible Treasury John Nelson Darby, William Kelly, F.
