Placenta A Neglected Experimental Animal:

Family Values Kelly Oliver, 2018-05-11 *Family Values* shows how the various contradictions at the heart of Western conceptions of maternity and paternity problematize our relationships with ourselves and with others Using philosophical texts psychoanalytic theory studies in biology and popular culture Kelly Oliver challenges our traditional concepts of maternity which are associated with nature and our conceptions of paternity which are embedded in culture Oliver's intervention calls into question the traditional image of the oppositional relationship between nature and culture maternal and paternal *Family Values* also undercuts recent returns to the rhetoric of a battle between the sexes by analyzing the conceptual basis of these descriptions in biological research and the presuppositions of such suggestions in philosophy and psychoanalysis By developing a reconception of maternity and paternity *Family Values* offers hope for peace in the battle of the sexes Vergleichende Reproduktionsbiologie der Wirbeltiere V. Blüm, 2013-03-14 Ein Lehrbuch *Placental Toxicology* B. V. Rama Sastry, 1995-02-24 *Placental Toxicology* examines placental transfer and toxicology of drugs and environmental agents to placenta as well as to fetus For the first time in a single volume placental and fetal consequences of exposure of pregnant women to drugs environmental chemicals and infections such as HIV are discussed Topics include The art of in vitro perfusion of human placenta Abuse of alcohol nicotine morphine and cocaine during pregnancy their placental transfer and fetal growth retardation Placental transfer and fetal toxicities of environmental insecticides Placental hormones and fetal well being Placental transfer of HIV and treatment of pregnant women with anti HIV drugs **Placenta** Peter Beaconsfield, Claude Villee, 2013-10-22 *Placenta A Neglected Experimental Animal* covers the proceedings of the 1978 round table discussion on placenta held at Bedford College University of London under the auspices of the Special Commission on Internal Pollution The placenta's remarkably complete spectrum of cellular and biochemical activity as well as its hormonal and endocrinological roles and its short life cycle adds to its suitability for studying the processes of cell replication immune mechanisms graft acceptance and rejection and aging This book is organized into four sections encompassing 19 chapters Section I emphasizes the process of placental metabolism This section particularly deals with the principles of metabolic regulation carbohydrate fat and protein metabolism placenta's endocrine functions and in vitro and in vivo studies of placental metabolism Section II highlights the placenta's potential to delineate cell replication processes This section describes the origin and formation of placenta and the mechanism of carcinogenesis Section III focuses on the relevance of placenta and its potential as a model for studying malignancy while Section IV examines its potential as a model for organ aging This book will be of value to cell and developmental biologists immunologists and oncologists *Vertebrate Reproduction* Volker Blüm, 2012-12-06 Oral birth in the Australian gastric brooding frog *Rheobatrachus sUus* 2 Preface I have deliberately chosen the title picture to the preface which shows the oral birth of a young gastric brooding frog *Rheobatrachus situs* to draw the reader's attention to the preface since I wish to explain why the book was written and

illustrated in the way it now appears The book has grown out of the material of a lecture course taking 3 to 4 hours per week each semester that I have given for several years at the Ruhr University Bochum as the theoretical basis for an intensive 4 week practical course on vertebrate reproduction for students of biology For various reasons I am a hardened opponent of giving lecture notes to the students On the other hand I found that my students made great efforts to work through and supplement their own lecture notes by studying the literature However there are no suitable textbooks on vertebrate reproduction written in German and the standard work in this field is now several decades old and deals mainly with mammals The students were therefore often frustrated in their efforts given the limited time they had available I have therefore decided to present here the most important structural and functional aspects of vertebrate reproduction and include other material to extend the framework of my original lectures
