Writing Intimacy into Feminist Geography
Pamela Moss, Courtney Donovan, 2017-02-24 Intimacy expressed through the feelings and sensations of the researcher is bound up in the work of a feminist geographer Tapping into this intimacy and including it in academic writing facilitates a grasping of the effects of power in particular places and initiates a discussion about how to access and tease out what constitutes the intimate both ethically and politically throughout the research process This collection provides valuable reflections about intimacy in the research process from encounters in the field through data analysis to the various pieces of written work A global and heterogeneous pool of scholars and researchers introduce personal ways of writing intimacy into feminist geography As authors expand existing conceptualizations of intimacy and include their own stories chapters explore the methodological challenges of using intimacy in research as an approach a topic and a site of interaction The book is valuable reading for students and researchers of Geography as well as anyone interested in the ethics and practicalities of feminist critical and emotional research methodologies

A Catalogue of Books Placed in the Galleries in the Reading Room of the British Museum. Printed by Order of the Trustees G. W. Porter, 1886

Mapping the Private Geography Gerri Reaves, 2001. How we write about ourselves is often a reflection of how we perceive both our own identities and our culture. This study of autobiographical writing and its reflection of personal and national identity focuses on four writers and the ways in which their work maps the internal and external self. Using the neglected autobiographical texts of Gertrude Stein, Lillian Hellman, Sam Shepard and Joan Didion, this text analyzes the different ways in which these authors balance individual American identity with collective identities and reinvent their familial, cultural or national engenderings. Each of these authors creates a private geography, a psychological map, a myth, an ideology or a fiction while at the same time exploring who can claim ownership to memory, history and the self. This volume will prove valuable to those studying the work of any of the featured authors as well as those seeking insight into the way an
