Plan To Win:

Why Teams Win Saul L. Miller, 2009-08-26 Winning isn't easy. The world is becoming more and more competitive with a greater need than ever for people to work together effectively in teams to make organizations successful. There is no better model for success in business than the world of sport with its bottom line performance culture and its relentless focus on creating winning teams. In *Why Teams Win*, renowned sports psychologist Dr. Saul L. Miller, the man who teaches elite athletes and top sports teams how to be successful, uses sport as a powerful metaphor for the world of business. *Why Teams Win* distills Dr. Miller's work with hundreds of high performance teams in the worlds of sport, business, healthcare, and the arts into lessons to help business teams perform. *Why Teams Win* identified the 9 key characteristics of successful teams. Describes how to improve personal, organizational, and team performance in each of these 9 areas. Explains how and why to apply different strategies to different types of teams. Outlines how to balance the needs of the individual with the needs of the team. Helps people work together and perform to the best of their abilities. Shows how to get the maximum potential out of a group of individuals. Features advice, quotes, and interviews from high profile athletes and coaches, as well as from business leaders. Includes self-evaluation and team building exercises. *Why Teams Win* offers anyone wanting to improve their personal and team performance a proven and accessible formula for success.

Plan to Win Steve Smith, 1998 Action, not theory, is the key word in this unusually straightforward approach to business strategy that offers managers guidance on the all important matter of the implementation of a strategy on which success or failure so often hangs. Planning to win is Steve Smith's term for a management system that combines both Eastern and Western approaches and is used today in some of the world's leading companies. More mundanely termed strategy deployment in his presentation, the concept becomes a road map by which any business leader or manager can learn the professional techniques of implementing a strategy so as to win, not lose. With examples drawn from the best practice of the world's most successful companies, his book also provides action plans, tools, diagrams, charts, and cartoons. It is based on the Quest Approach Strategy into Action technique that he has perfected with blue chip multinationals but is equally suited to companies of any size.
