**Naraina Pillai: Builder Of The Sri Mariamman Temple** Shawn Seah, 2023-04-11 Naraina Pillai is determined. Although his cotton business is destroyed by a fire, Naraina bounces back. He becomes a successful merchant and community leader. To help others in society, Naraina builds the original Sri Mariamman Temple at South Bridge Road. Today, Pillai Road helps us remember this pioneer's contributions to society. Who are our amazing pioneers, the people who travelled from distant lands to seek out adventure and fortune in early Singapore? In this series of fully illustrated books, you'll discover our pioneers' inspiring stories, some of which have never been written out for children before. So come and celebrate the people who have made a difference to Singapore through their hard work, service, and sacrifice. **Biblical Servant Leadership** Steven Crowther, 2018-06-13 This book explores the concepts from Scripture for servant leadership and compares these findings with contemporary models of servant leadership. It is an examination of Christian leadership for the contemporary world in its global and increasing secular context. Leadership studies typically view leadership externally from the results. This is a good beginning, but leadership needs to also view the inside of leadership in the person of the leader. Scripture is uniquely qualified in this area since its first concern is the person who leads, not just in leadership behaviors. The author uses examples from both the Old and New Testament to establish a new shepherd model of leadership that moves beyond the servant mode to the mode of caring direction. This model will provide scholars and researchers, as well as leaders themselves, with a way of leading that overcomes negative forms of leadership which lead to failure. Lectures on Innovation in Building Technology Mick Eekhout, 2016-03-15 This book is a collection of articles written in recent years and used in lectures for students at the Faculty of Architecture at Delft and at Nottingham University. The lectures and articles are based on a mixture of innovations in academia and industry. They elucidate the relationship between architecture and building technology, as well as high technology transfer of technology, innovative design, development, and research in the Chair of Product Development at TU Delft. With his experience in both industry and academia, Eekhout's goal is to bridge the gap between the two worlds and to stimulate them both to prepare students to be inventive, innovative, and daring enough to materialize their own dreams in practice. The lecture articles are based on the adventures and experiences in Mick Eekhout's design-build experimental laboratory-cum-factory, which works on projects all over the world and for many interesting clients. Eekhout was able to develop an innovative technical vocabulary for lightweight structures and claddings in architecture and encourages students to attempt the same.
