Hyde, 2009 Explores the business history of three major independent American automakers Nash Motor Company the Hudson Motor Car Company and the American Motors Company that faced fierce competition from the Big Three With roots extending back to the first decade of the twentieth century Nash Motor Company and the Hudson Motor Car Company managed to compete and even prosper as independent producers until they merged in 1954 to form the American Motors Company which itself remained independent until it was bought in 1987 by the Chrysler Corporation In Storied Independent Automakers renowned automotive scholar Charles K Hyde argues that these companies while so far neglected by auto history scholars made notable contributions to automotive engineering and styling and were an important part of the American automobile industry Hyde investigates how the relatively small corporations struggled in a postwar marketplace increasingly dominated by the giant firms of Ford General Motors and Chrysler which benefited from economies of scale in styling engineering tooling marketing and sales He examines the innovations that kept the independents products distinctive from those of the Big Three and

allowed them to survive and sometimes prosper against their larger competitors Hyde also focuses on the visionary leaders who managed the companies including Charles Nash Roy D Chapin Howard Coffin George Mason George Romney and Roy D Chapin Jr who have been largely unexamined by other scholars Finally Hyde analyzes the ultimate failure of the American Motors Company and the legacy it left for carmakers and consumers today *Storied Independent Automakers* is based on extensive research in archival collections generated by the three companies Residing in large part in the DaimlerChrysler Corporate Collection these sources have been seldom tapped by other scholars before this volume Auto historians and readers interested in business history will enjoy *Storied Independent Automakers* **Hidden Assets** Richard Rosenfeld, 2006 After reviewing the area's performance on the standard indicators of growth and development this volume identifies several hidden assets that distinguish St Louis from other metropolitan areas Provided by publisher **American Book Publishing Record**, 2002 *Financing Innovation in the United States, 1870 to the Present* Naomi R. Lamoreaux, Kenneth Lee Sokoloff, 2007 Leading economists and economic historians offer case studies and theoretical perspectives that fill a longstanding gap in the existing literature on technology driven industrial development discussing the interaction of finance and technological innovation in the American economy since the Second Industrial Revolution Although technological change is vital for economic growth the interaction of finance and technological innovation is rarely studied This pioneering volume examines the ways in which innovation is funded in the United States In case studies and theoretical discussions leading economists and economic historians analyze how inventors and technologically creative entrepreneurs have raised funds for their projects at different stages of U S economic development beginning with the post Civil War period of the Second Industrial Revolution Their discussions point to intriguing insights about how the nature of the technology may influence its financing and conversely how the availability of funds influences technological advances These studies show that over the long history of American technological advancement inventors and innovators have shown considerable flexibility in finding ways to finance their work They have moved to cities to find groups of local investors they have worked for large firms that could tap the securities market for funds they have looked to the federal government for research and development funding and they have been financed by the venture capital industry The studies make it clear that methods of funding innovation whether it is in the auto industry or information technology have important implications for both the direction of technological change and the competitive dynamism of the economy **Sources of Information in Highways** John B.
