Piscinae James Arnold Higginbotham, 1997 Pisciculture_the process of raising fish_held a lasting fascination for the people of ancient Rome Whether bred for household consumption cultivated for sale at market or simply kept in confinement for reasons of aesthetic appreciation fish remained a **A Companion to Roman Italy** Alison E. Cooley, 2016-01-05 A Companion to Roman Italy investigates the impact of Rome in all its forms political cultural social and economic upon Italy's various regions as well as the extent to which unification occurred as Rome became the capital of Italy The collection presents new archaeological data relating to the sites of Roman Italy Contributions discuss new theories of how to understand cultural change in the Italian peninsula Combines detailed case studies of particular sites with wider ranging thematic chapters Leading contributors not only make accessible the most recent work on Roman Italy but also offer fresh insight on long standing debates *Roman Villas in Central Italy* Annalisa Marzano, 2007-08-31 This volume which was awarded Honorable Mention and a Silver Medal from the Premio Romanistico Internazionale Gérard Boulvert investigates the socio-economic role of elite villas in Roman Central Italy drawing on both documentary sources and material evidence Through the composite picture emerging from the juxtaposition of literary texts and archaeological evidence the book traces elite ideological attitudes and economic behavior caught between what was morally acceptable and the desire to invest capital intelligently The analysis of the biases affecting the application of modern historiographical models to the interpretation of the archaeology frames the discussion on the identification of slave quarters in villas and the putative second century crisis of the Italian economy The book brings an innovative perspective to the debate on the villa system and the decline of villas in the imperial period **Architectural Invention in Renaissance Rome** Yvonne Elet, 2018-01-11 Villa Madama Raphael's late masterwork of architecture landscape and decoration for the Medici popes is a paradigm of the Renaissance villa The creation of this important unfinished complex provides a remarkable case study for the nature of architectural invention Drawing on little known poetry describing the villa while it was on the drawing board as well as ground plans letters and antiquities once installed there Yvonne Elet reveals the design process to have been a dynamic collaborative effort involving humanists as well as architects She explores design as a self-reflexive process and the dialectic of text and architectural form illuminating the relation of word and image in Renaissance architectural practice Her revisionist account of architectural design as a process engaging different systems of knowledge visual and verbal has important implications for the relation of architecture and language meaning in architecture and the translation of idea into form **The Bloomsbury Handbook of Experimental Approaches to Roman Archaeology** Lee Graña Nicolaou, Tatiana Ivleva, Bill Griffiths, 2024-12-12 This volume is the first comprehensive overview of Roman experimental archaeology exploring its key themes methodologies and applications through a diverse array of international case studies Experiments simulations and reconstructions are important methods for understanding the past from uncovering how ancient objects and structures were made used destroyed

deposited and affected underground to illuminating the experiences of tasting ancient foods fighting alongside comrades or living in replicated structures Although the incorporation of experimentation has had great success in prehistoric studies greater reliance on the wealth of literary and material sources remaining from the classical period has meant that its potential for Roman studies has yet to be fully realised The 26 chapters in this book are divided into 5 thematic parts each of which opens with a contextualizing introduction that frames the detailed case studies found in individual chapters and showcases the actual and potential diversity of experimentation as applied to the Roman past by scholars re enactors and practitioners in the heritage sector In laying out a detailed guide to Roman experimental archaeology the volume as a whole maps its past present and future and provides a firm foundation for further practical research and collaboration In doing so it reasserts that experiments and reconstructions are a significant resource for testing or developing theories rather than merely artistic replicas and that the vast amount of quantifiable data they yield can be invaluable in support of interpretations of relevant archaeological or historical evidence regardless of the period in question and beyond the confines of academia
