

# MS Virtual & Print Inquiry Lab

The image displays a virtual chemistry lab environment. In the foreground, a tablet shows the 'Organic Compounds Inquiry Lab' interface. The screen is divided into sections: a title bar, a procedure list, a workspace for building a model, and a video player at the bottom. The procedure step 4 instructs the user to build a model of a compound using available shapes (lines for bonds, circles for atoms). The workspace shows a water molecule (H<sub>2</sub>O) being constructed with one white hydrogen atom and two red oxygen atoms connected by lines. Below the workspace, there are four empty lines for notes and a small icon of a folder. The video player at the bottom shows a progress bar and a play button. In the background, two student lab sheets are visible. The left sheet is titled 'Compounds Student Lab Sheet' and contains a procedure list and a section for building a compound. The right sheet is titled 'Compound Chart' and contains a table for recording data. The background also features various chemical structures, including a benzene ring, a carboxylic acid, and a nucleotide base.
